THE HISTORY INVOICE

INV-006 THE WINTER BILL

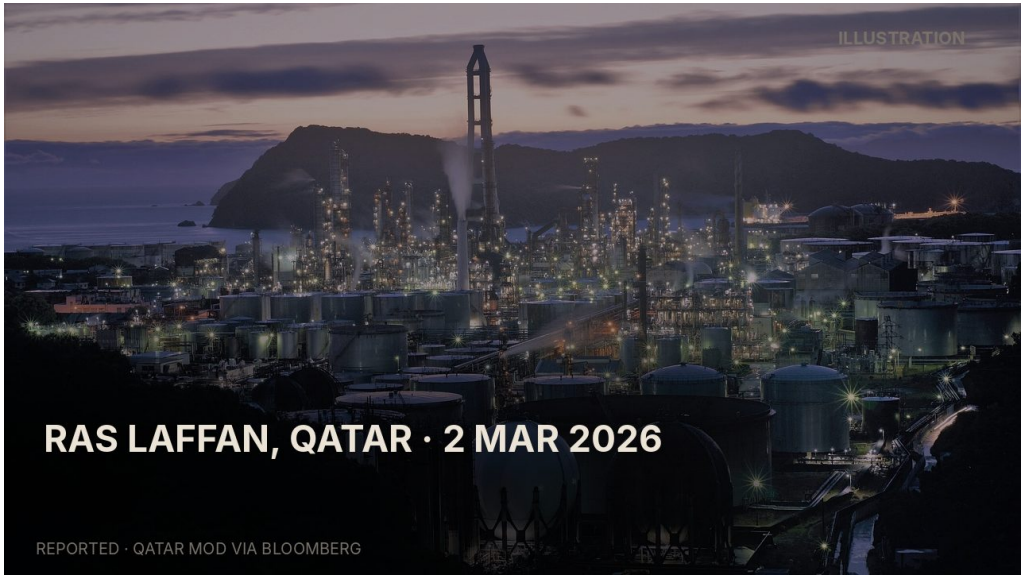

Picture storyboard v1 - built from script v3 (2,400 words, ~18 min). 82 panels, one per script row.

REVIEW ONLY. Not the video: no voice, no render, no upload. INV-006 stays on hold until you say go.

Panels are rough frames. Charts marked 'curve shape illustrative' use the real end values but a sketched line between them.

Photo panels are Pixabay reference stills (Pixabay Content License, credits on the last page). Final footage gets picked at build.

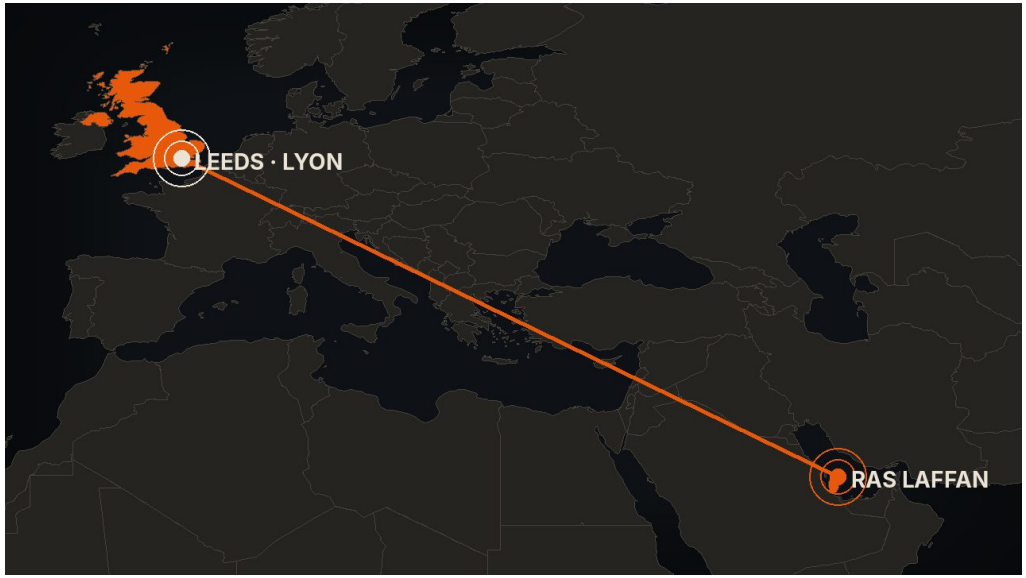

Each panel: code, voice line, on-screen text, confidence tag + source, sound.

CO-01 **ON SCREEN: RAS LAFFAN, QATAR · 2 MAR 2026**

VO: Ras Laffan, Qatar. The second of March, 2026. Two drones cross the coast, and the biggest gas export plant on Earth goes quiet.

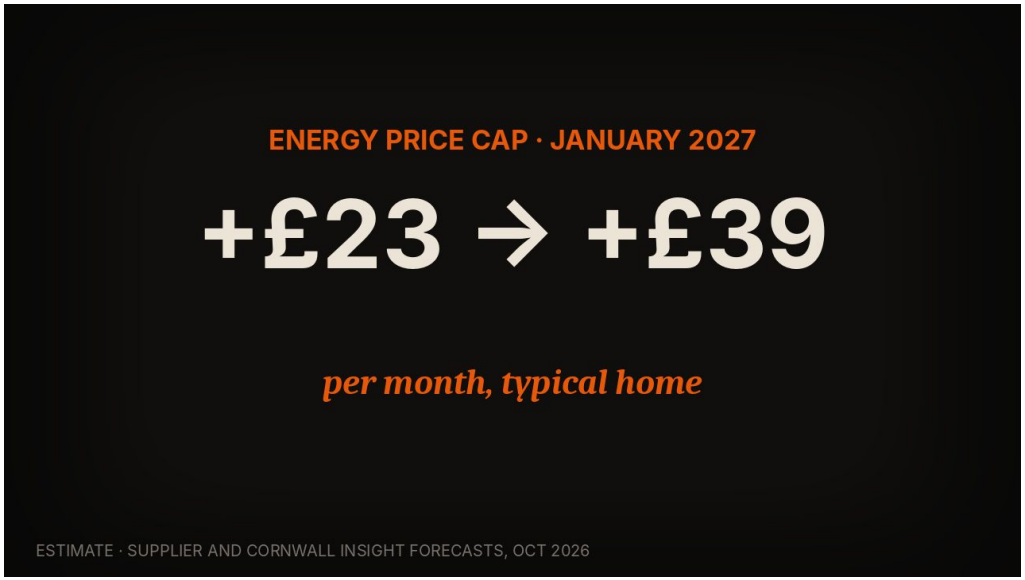

TAG: REPORTED · Qatar MoD via Bloomberg · SFX: low drone in, sub hit on 'quiet' · FACTS: F04

CO-02

VO: That silence lands on Britain's energy price cap in January. No one in Leeds or Lyon heard the drones. They will hear the bill.

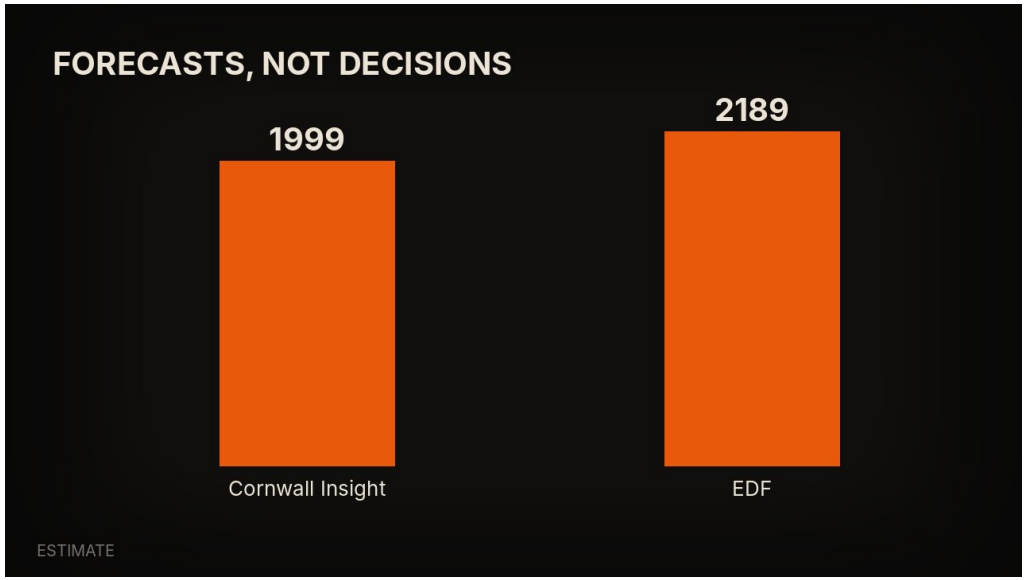

SFX: whoosh-deep

CO-03 **ON SCREEN: ENERGY PRICE CAP · JANUARY 2027**

VO: By the twenty-fifth of November, the regulator Ofgem will put a number on it. The forecasts say twenty-three to thirty-nine pounds more for a typical home, every month.

TAG: ESTIMATE · supplier and Cornwall Insight forecasts, Oct 2026 · SFX: counter roll, receipt printer · FACTS: F42 F43

CO-04 **ON SCREEN: FORECASTS, NOT DECISIONS**

VO: Some of that is a forecast, not a fact. Ofgem has not decided yet, and the forecasters disagree by almost two hundred pounds a year. We'll show you both ends.

TAG: ESTIMATE · SFX: tick · FACTS: F43

CO-05 **ON SCREEN: THE DOOR · THE TANK · THE AUCTION · THE LAST TIME · YOUR TABLE**

VO: By the end, you'll see every line on this bill. We'll follow the gas from that plant, through one strait, into Europe's half-empty tanks, past an auction where a single ship decides which way to turn, and onto your meter.

SFX: riser

P1-01 **ON SCREEN: PART 1 · THE DOOR**

VO: Part one. The door.

SFX: reverse cymbal + sub drop

P1-02 **ON SCREEN: 1 IN 5 LNG CARGOES**

VO: Before this war, about one fifth of all the liquefied gas traded on the planet sailed through a single strait. Hormuz.

TAG: VERIFIED · EIA, 2024 · SFX: whoosh-deep + scan · FACTS: F01

P1-03 **ON SCREEN: QATAR 9.3 · UAE 0.7 BCF/D**

VO: Almost all of it came from one country. Qatar shipped about nine billion cubic feet a day through that water in 2024. The Emirates added a little more.

TAG: VERIFIED · EIA, 2024 · SFX: card land · FACTS: F02

P1-04 **ON SCREEN: 83% TO ASIA**

VO: Most of it went east. About eighty-three percent ended up in Asia. Europe took far less. So you might think a closed strait is Asia's problem.

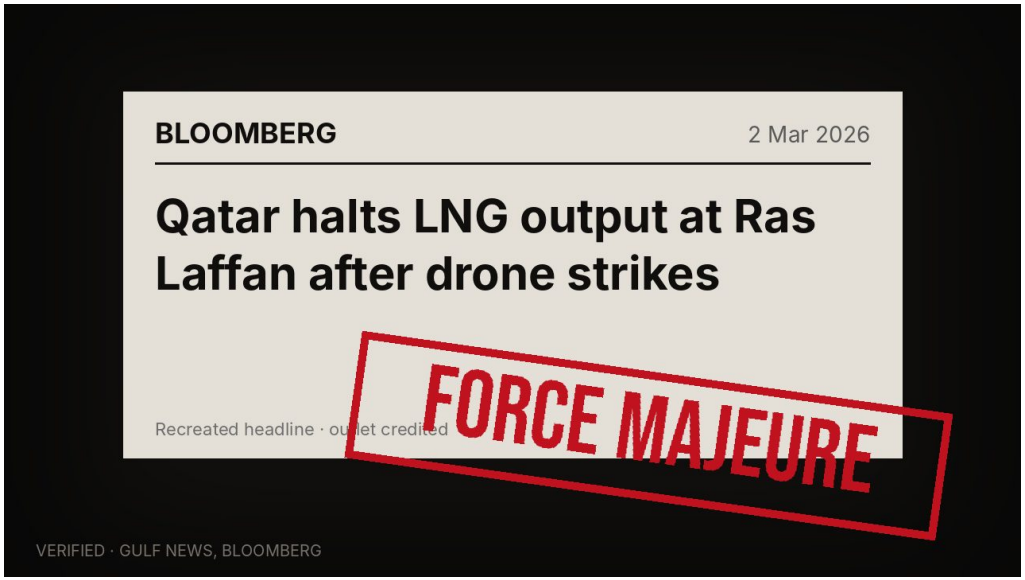

TAG: VERIFIED · EIA, 2024 · SFX: chart grow · FACTS: F03

P1-05

VO: It isn't. And the reason is the whole story of this winter: when Asia loses its gas, it comes shopping for yours.

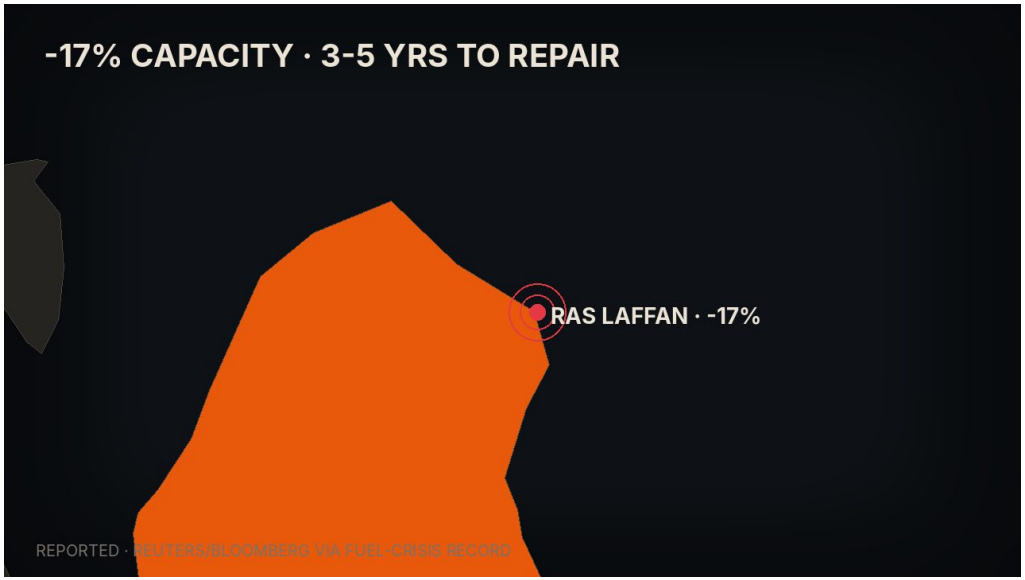

SFX: sub hit

P1-06 **ON SCREEN: FORCE MAJEURE · 3 MAR 2026**

VO: On the second of March, Qatar said two Iranian drones hit its gas facilities. QatarEnergy stopped all production. The next day it declared force majeure, the legal phrase for: we cannot deliver what we promised.

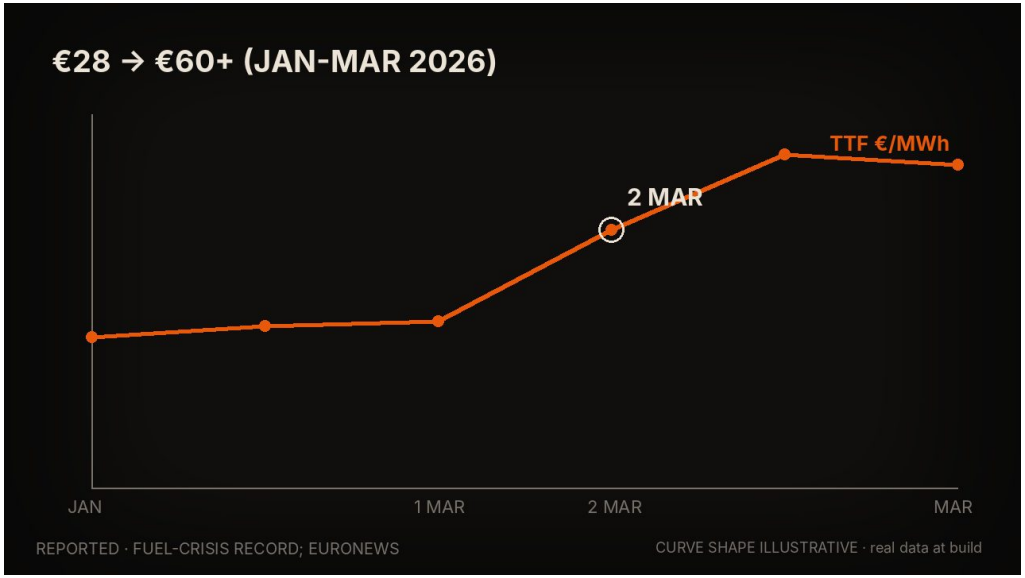

TAG: VERIFIED · Gulf News, Bloomberg · SFX: stamp thud · FACTS: F04 F05

P1-07 **ON SCREEN: -17% CAPACITY · 3-5 YRS TO REPAIR**

VO: On the eighteenth of March, Iran struck the idle complex itself. Reports put the damage at about seventeen percent of Qatar's export capacity, with repairs measured in years, not months.

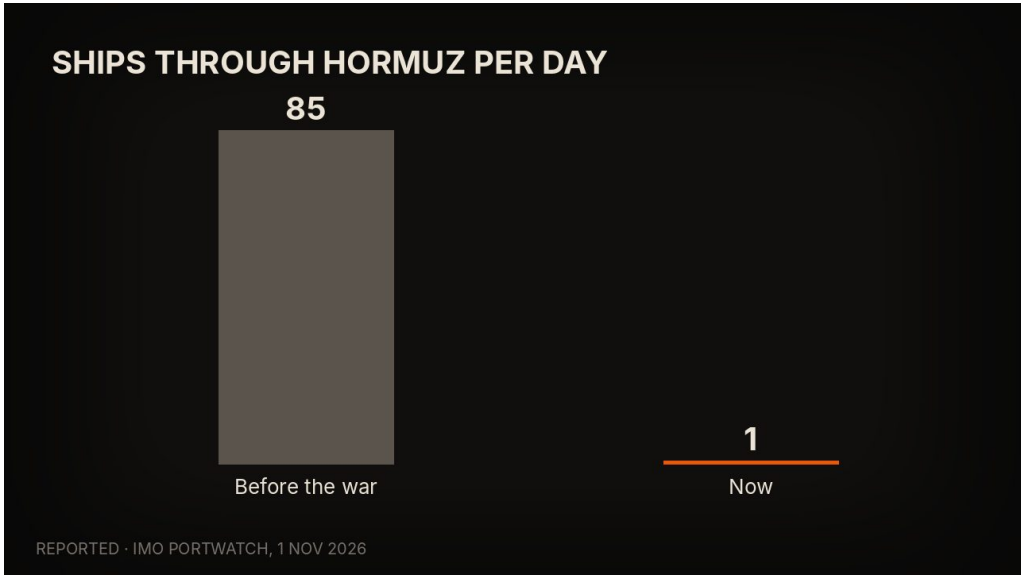

TAG: REPORTED · Reuters/Bloomberg via fuel-crisis record · SFX: sub_808 · FACTS: F06

P1-07b **ON SCREEN: €28 → €60+ (JAN-MAR 2026)**

VO: Markets felt it within days. Europe's benchmark gas price nearly doubled after the first attack, and by mid-March it was above sixty euros, from about twenty-eight in January.

TAG: REPORTED · fuel-crisis record; Euronews · SFX: chart grow · FACTS: F54 F34

P1-08 **ON SCREEN: 85 → 1 SHIP A DAY**

VO: And the door itself stayed shut. On the first of November 2026, the IMO counted one ship crossing Hormuz. One. Before the war, the average was eighty-five a day.

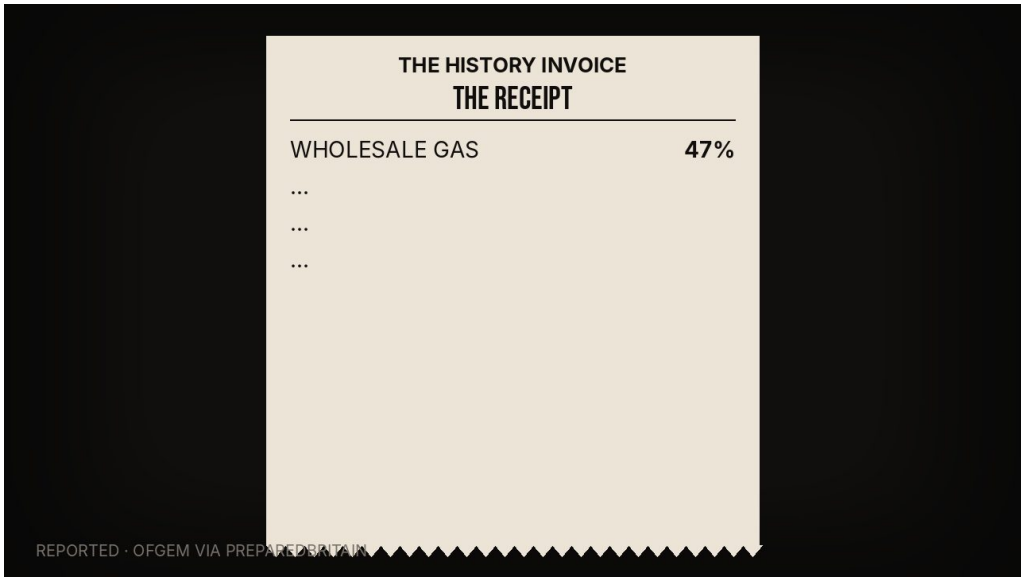

TAG: REPORTED · IMO PortWatch, 1 Nov 2026 · SFX: whip + card + counter · FACTS: F09

P1-09 **ON SCREEN: NO GULF LNG TO THE EU SINCE MAY 2026**

VO: No Gulf gas has reached the European Union since May. And QatarEnergy has pushed its force majeure to at least the end of December 2026.

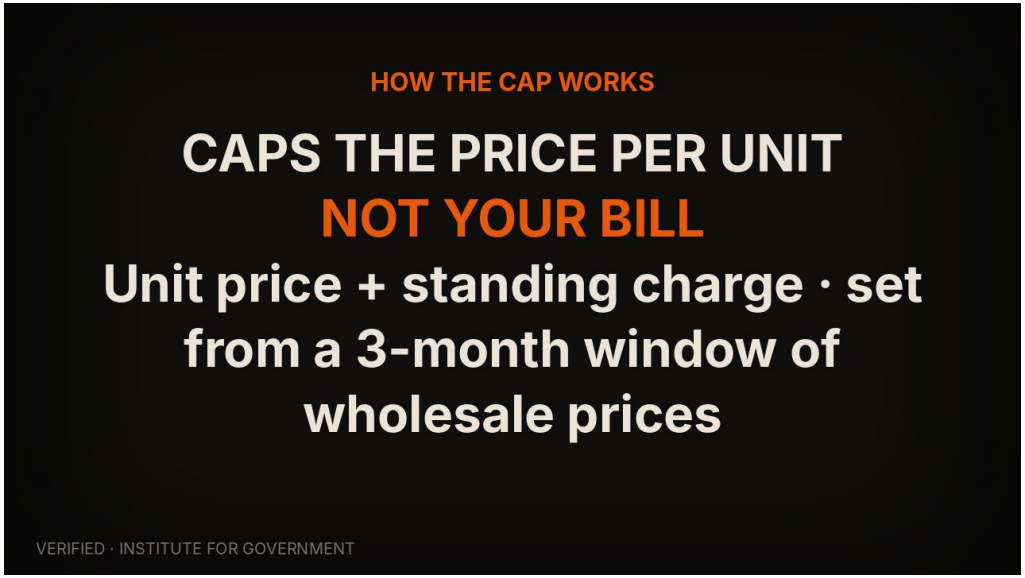

TAG: REPORTED · Bruegel via Euronews; OilPrice, 4 Nov 2026 · SFX: tick · FACTS: F08 F07

P1-10 **ON SCREEN: WHOLESALE = 47% OF YOUR CAP**

VO: So here is the first line on your bill. In the UK, wholesale energy was forty-seven percent of the cap in October. When wholesale gas goes up, the cap follows, a few months later.

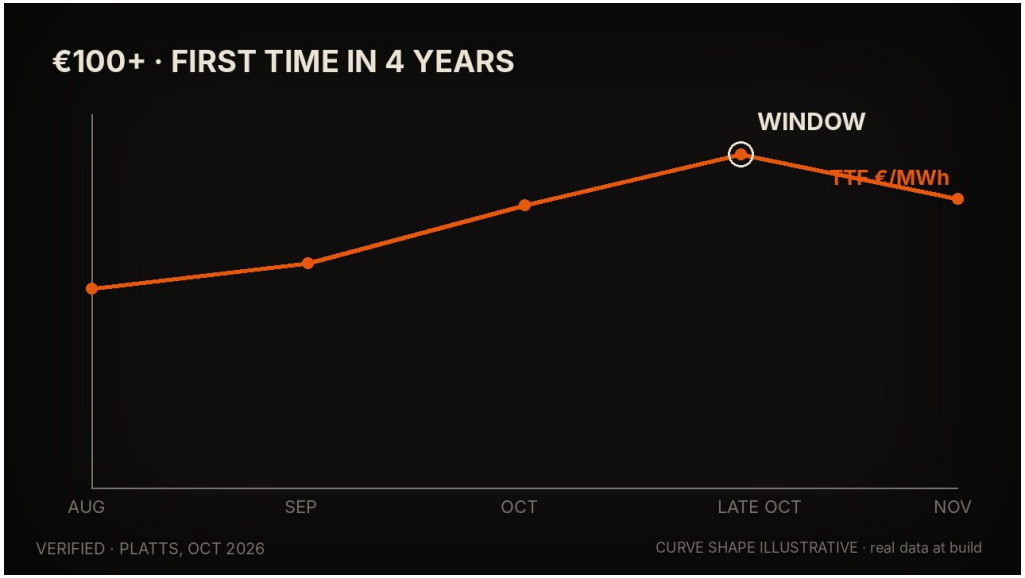

TAG: REPORTED · Ofgem via PreparedBritain · SFX: printer · FACTS: F39

P1-10b **ON SCREEN: CAPS THE PRICE PER UNIT, NOT YOUR BILL**

VO: Here's how that works. The cap doesn't limit your total bill. It limits the price of each unit of energy, and the daily standing charge. Ofgem resets it every three months, using what gas cost on the forward market in roughly the three months before it announces.

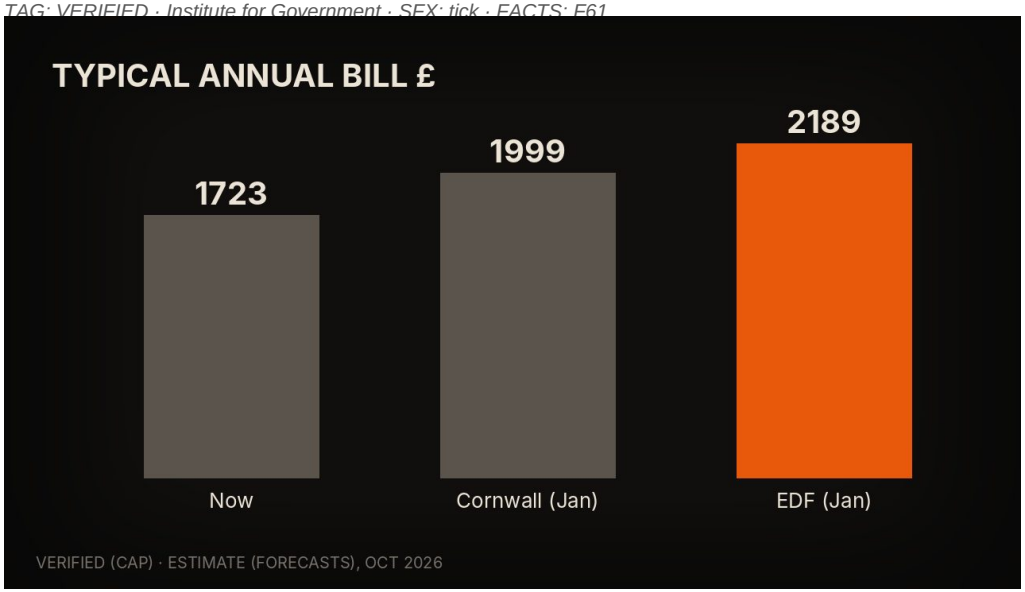

TAG: VERIFIED · Institute for Government · SFX: tick · FACTS: F61

P1-10c **ON SCREEN: €100+ · FIRST TIME IN 4 YEARS**

VO: So the January cap is built from the autumn. And in late October, Europe's benchmark gas price went above a hundred euros for the first time in four years.

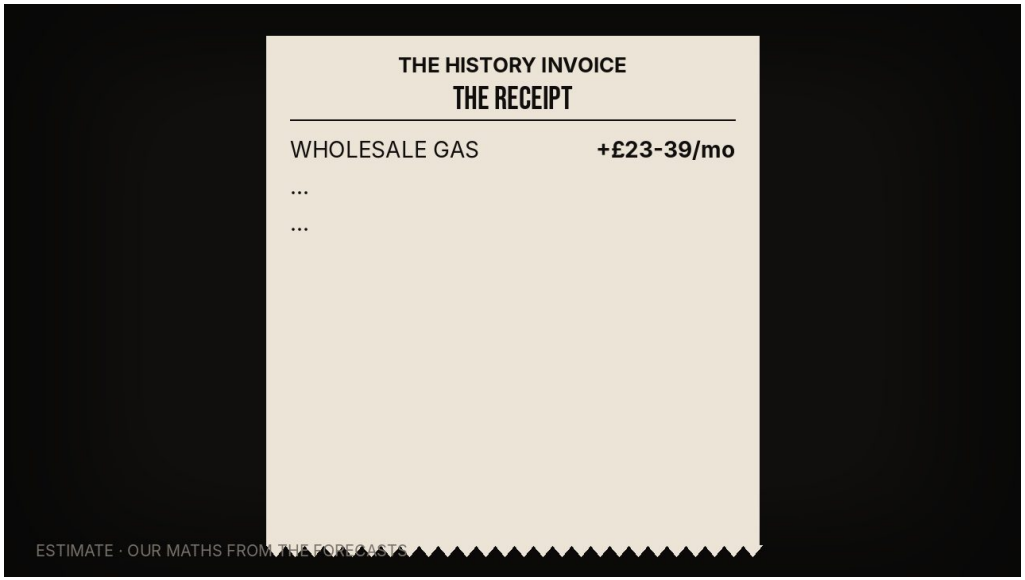

TAG: VERIFIED · Platts, Oct 2026 · SFX: sub hit · FACTS: F63 F35

P1-11 **ON SCREEN: £1,723 → £1,999-£2,189**

VO: The energy price cap is one thousand, seven hundred and twenty-three pounds a year from October to December 2026. For January, Cornwall Insight forecasts one thousand, nine hundred and ninety-nine. EDF forecasts two thousand, one hundred and eighty-nine.

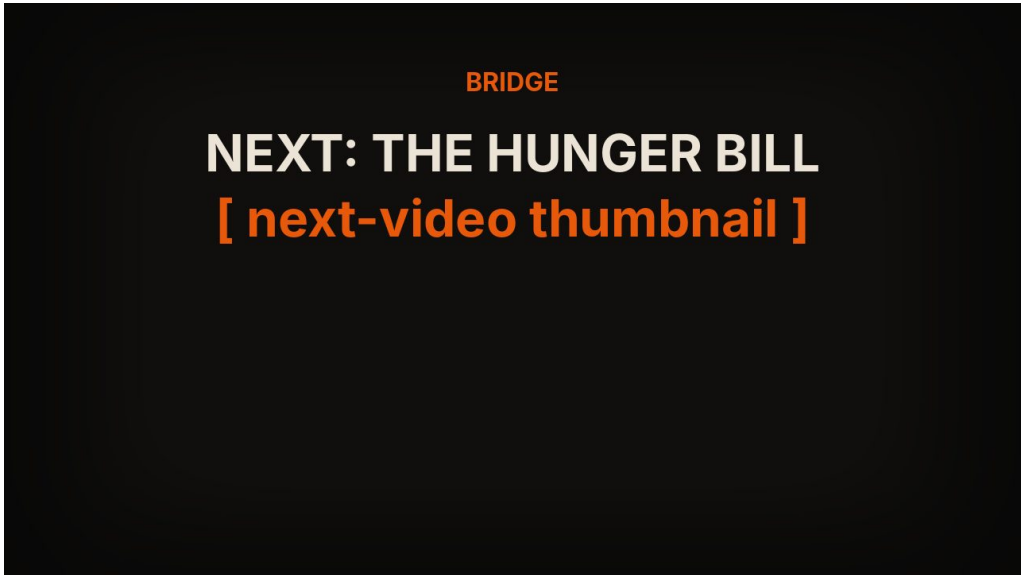

TAG: VERIFIED (cap) · ESTIMATE (forecasts), Oct 2026 · SFX: counter roll · FACTS: F41 F43

P1-12 **ON SCREEN: +£23 TO £39 A MONTH**

VO: That's an extra twenty-three to thirty-nine pounds a month at the annual rate. And winter months use more energy than the average, so a real January bill jumps by more than that.

TAG: ESTIMATE · our maths from the forecasts · SFX: receipt print · FACTS: F43 maths

BR-01 **ON SCREEN: NEXT: THE HUNGER BILL**

VO: If you want the next bill before it arrives, subscribe. Our next video follows the same gas into fertilizer, and into the price of your bread.

SFX: riser air

P2-01 **ON SCREEN: PART 2 · THE TANK**

VO: Part two. The tank.

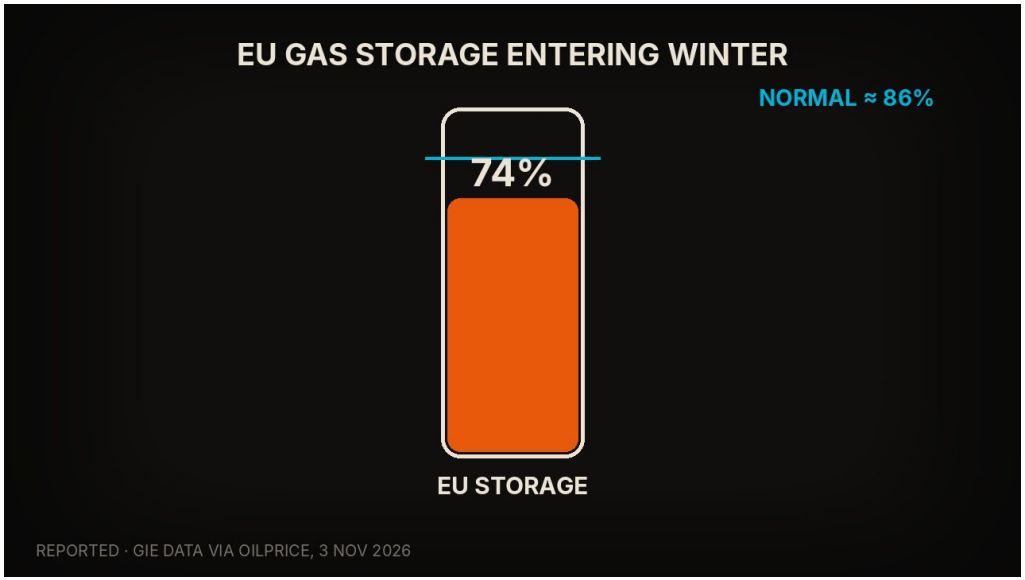

SFX: reverse cymbal + sub drop

P2-02

VO: Europe gets through winter on what it saved in summer. Gas is pumped underground from April to October, then pulled out when it's cold.

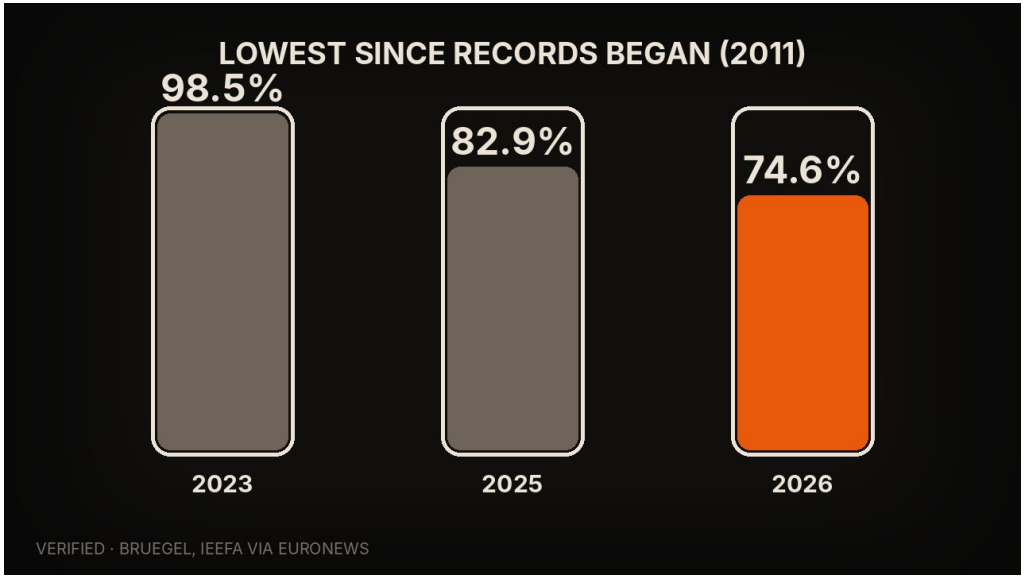

SFX: drone

P2-03 **ON SCREEN: 74% FULL · NORMAL ≈ 86%**

VO: On the third of November 2026, the EU's tanks were seventy-four percent full. The five-year average for that date is about eighty-six.

TAG: REPORTED · GIE data via OilPrice, 3 Nov 2026 · SFX: chart grow · FACTS: F13

P2-04 **ON SCREEN: LOWEST SINCE RECORDS BEGAN (2011)**

VO: A year earlier, the tanks were nearly eighty-three percent full. In 2023, almost ninety-nine. Researchers at IEEFA say this is the lowest for the time of year since records began in 2011.

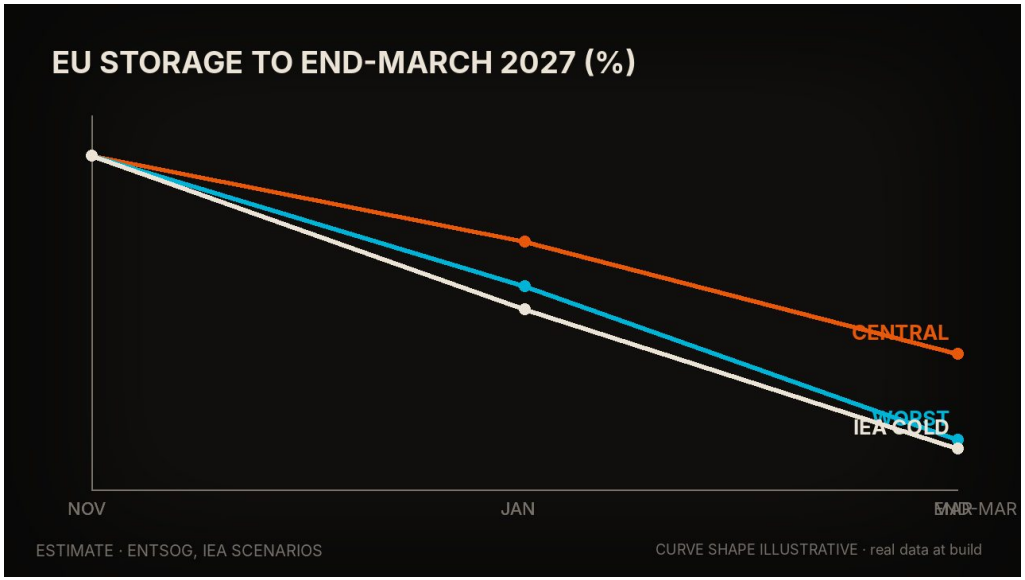

TAG: VERIFIED · Bruegel, IEEFA via Euronews · SFX: tick x3 · FACTS: F14

P2-05

VO: Why so low? Because refilling in summer meant buying gas at war prices, and Qatar's cargoes simply weren't there to buy.

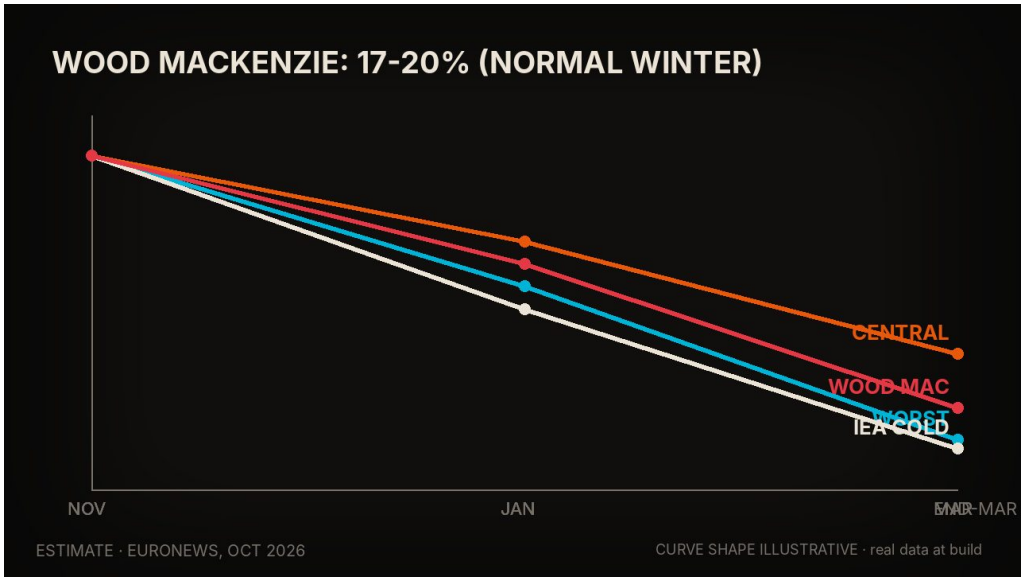

SFX: whoosh · FACTS: F08

P2-06 **ON SCREEN: CENTRAL 30% · WORST 11% · IEA COLD <10%**

VO: Now the scenarios. The European grid operators' central case ends the winter at about thirty percent. Their worst case, eleven. The International Energy Agency ran a cold winter with Hormuz still shut, and got below ten.

TAG: ESTIMATE · Entsog, IEA scenarios · SFX: chart grow · FACTS: F17 F16

P2-06b **ON SCREEN: WOOD MACKENZIE: 17-20% (NORMAL WINTER)**

VO: Analysts at Wood Mackenzie expect seventeen to twenty percent by the end of March, and that's in a normal winter.

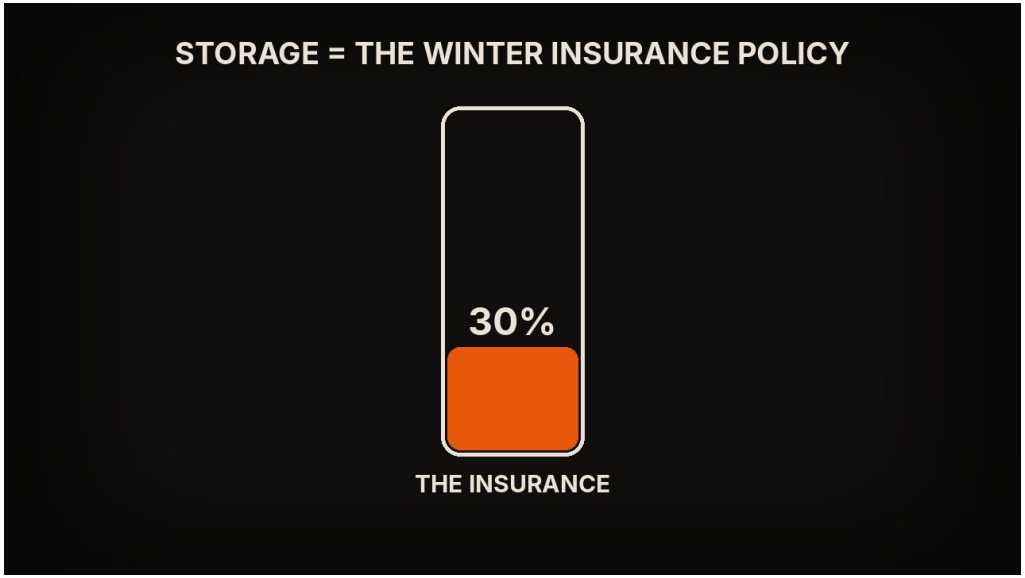

TAG: ESTIMATE · Euronews, Oct 2026 · SFX: tick · FACTS: F18

P2-07 **ON SCREEN: SCENARIOS, NOT FORECASTS**

VO: Those are scenarios, not forecasts. A mild winter changes everything. But here's the part most people miss.

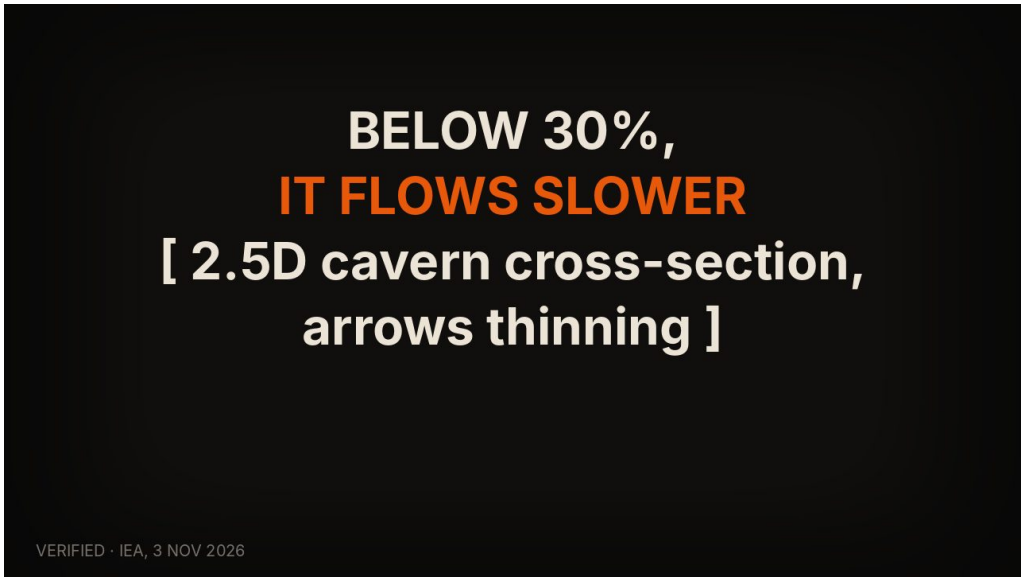

SFX: silence beat · FACTS: F16

P2-07b

VO: Think of storage as insurance you buy in summer and claim in winter. This year, Europe paid war prices for the policy and still couldn't buy the full cover.

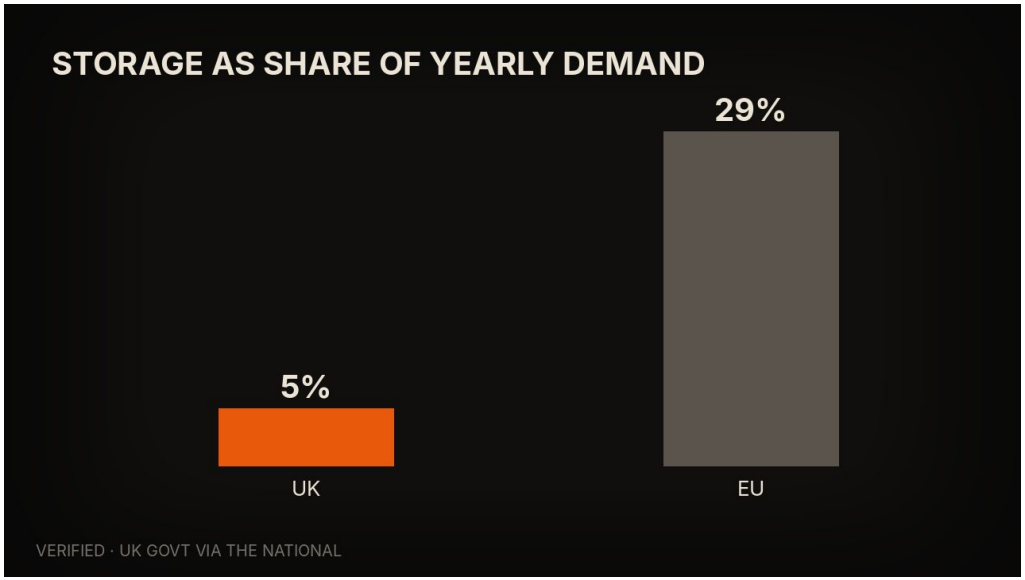

SFX: whoosh · FACTS: F13 F14

P2-08 **ON SCREEN: BELOW 30%, IT FLOWS SLOWER**

VO: The IEA says that once a tank drops below about thirty percent, gas comes out more slowly. The pressure falls. So a tank at twenty percent isn't a fifth of your safety. It's less.

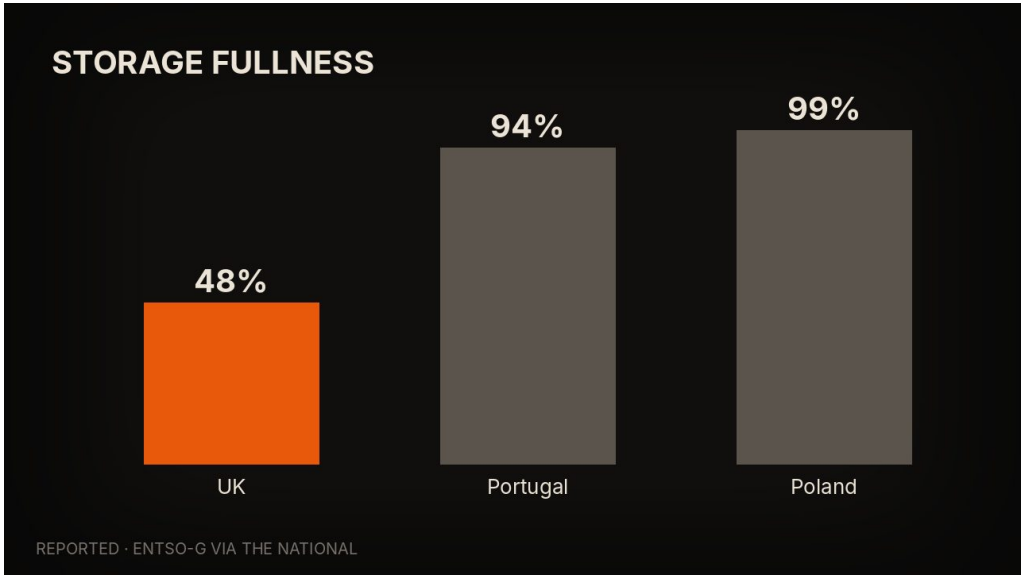

TAG: VERIFIED · IEA, 3 Nov 2026 · SFX: sub hit · FACTS: F19

P2-09 **ON SCREEN: UK 5% · EU 29%**

VO: Britain is in a weaker spot again. Its storage can hold only about five percent of a year's gas use. The EU average is twenty-nine.

TAG: VERIFIED · UK govt via The National · SFX: card land · FACTS: F22

P2-10 **ON SCREEN: UK 48% · PT 94% · PL 99%**

VO: At the start of October, UK storage was forty-eight percent full. Portugal was at ninety-four. Poland, ninety-nine.

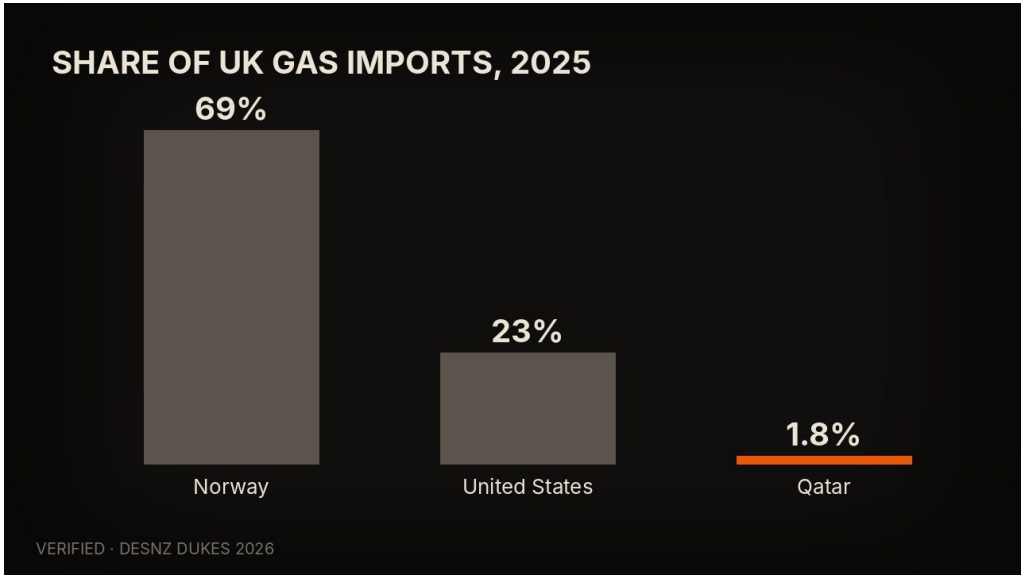

TAG: REPORTED · ENTSO-G via The National · SFX: tick · FACTS: F21

P2-11b **ON SCREEN: PRICED BY THE LAST CARGO**

VO: So why does a strait Britain hardly uses set Britain's price? Because gas is priced at the margin. Norway doesn't sell its gas cheaply to Britain just because it's next door. It sells at the European price, and the European price is set by the last cargo Europe has to fight for.

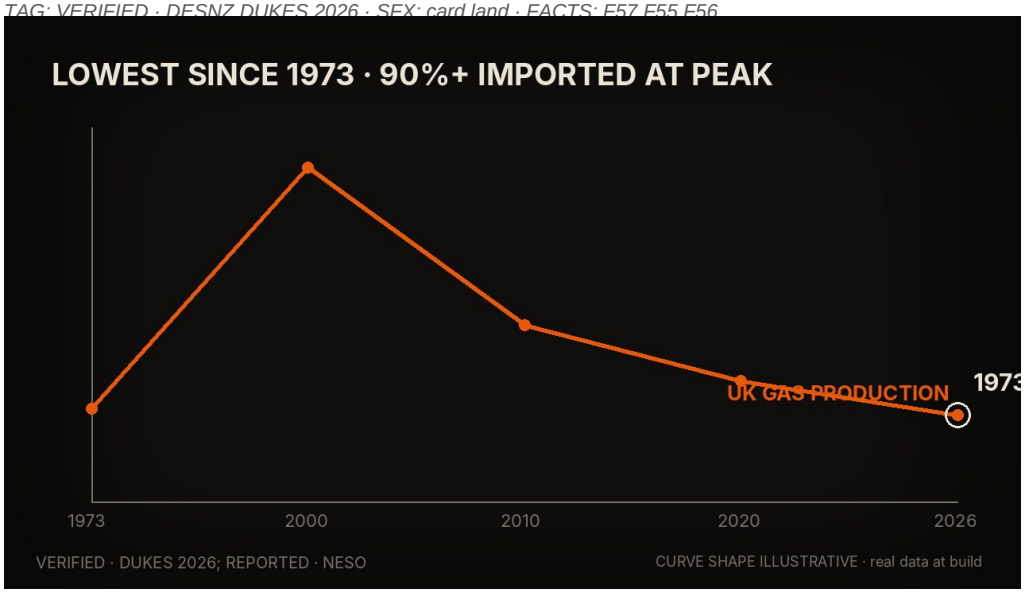

SFX: whoosh · FACTS: F55

P2-11a **ON SCREEN: QATAR: 1.8% OF UK GAS IMPORTS**

VO: Now a strange fact. Britain barely buys Qatari gas. In 2025, Qatar supplied less than two percent of the UK's gas imports. Norway supplied sixty-nine percent, through pipes under the North Sea. American tankers brought three quarters of the rest as liquefied gas.

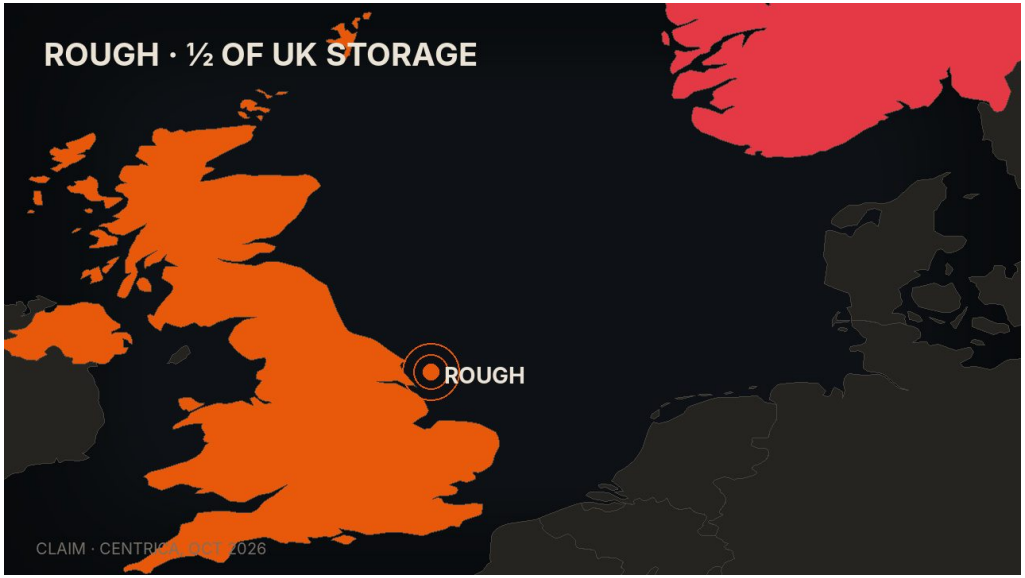

TAG: VERIFIED · DESNZ DUKES 2026 · SFX: card land · FACTS: F57 F55 F56

P2-11c **ON SCREEN: LOWEST SINCE 1973 · 90%+ IMPORTED AT PEAK**

VO: And Britain needs those imports more every year. Its own North Sea production fell again in 2025, to its lowest level since 1973. The grid operator's scenarios show imports covering more than ninety percent of demand on the coldest days.

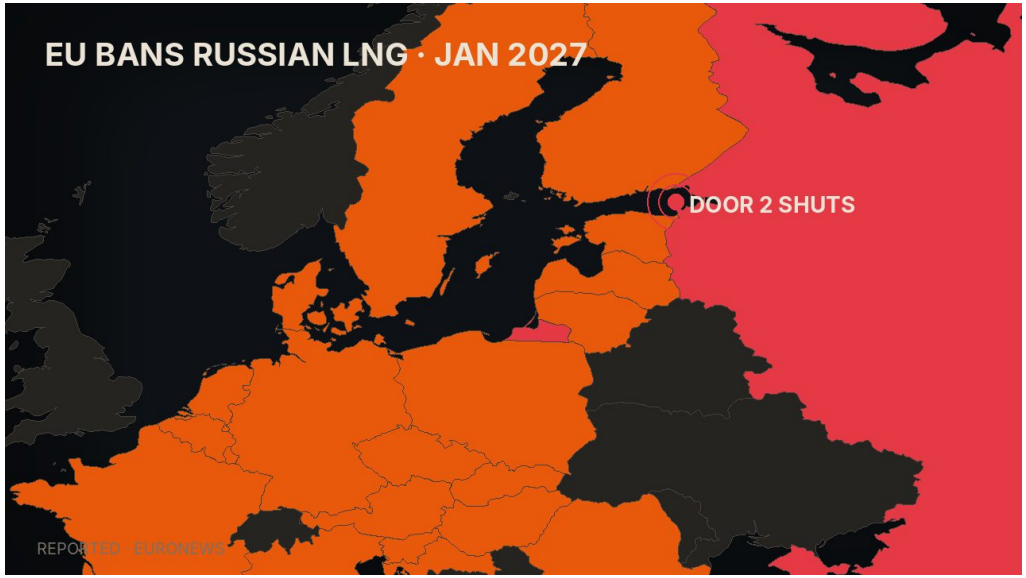

TAG: VERIFIED · DUKES 2026; REPORTED · NESO · SFX: chart grow · FACTS: F58 F60

P2-11 **ON SCREEN: ROUGH · ½ OF UK STORAGE**

VO: And about half of that small British tank is one old site off the Yorkshire coast. Rough. Its owner, Centrica, says it will close at the end of the first quarter without support for a two-billion-pound rebuild.

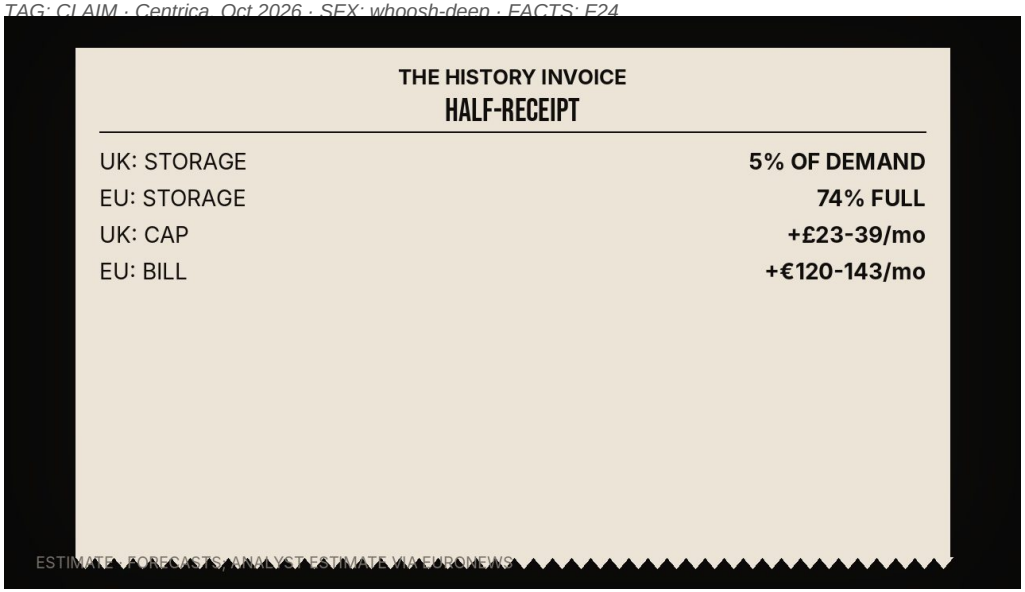

TAG: CLAIM · Centrica, Oct 2026 · SFX: whoosh-deep · FACTS: F24

P2-12 **ON SCREEN: EU BANS RUSSIAN LNG · JAN 2027**

VO: Then there's a second door closing. Russian liquefied gas was about a fifth of the EU's imports in the spring. From January 2027, the EU bans it.

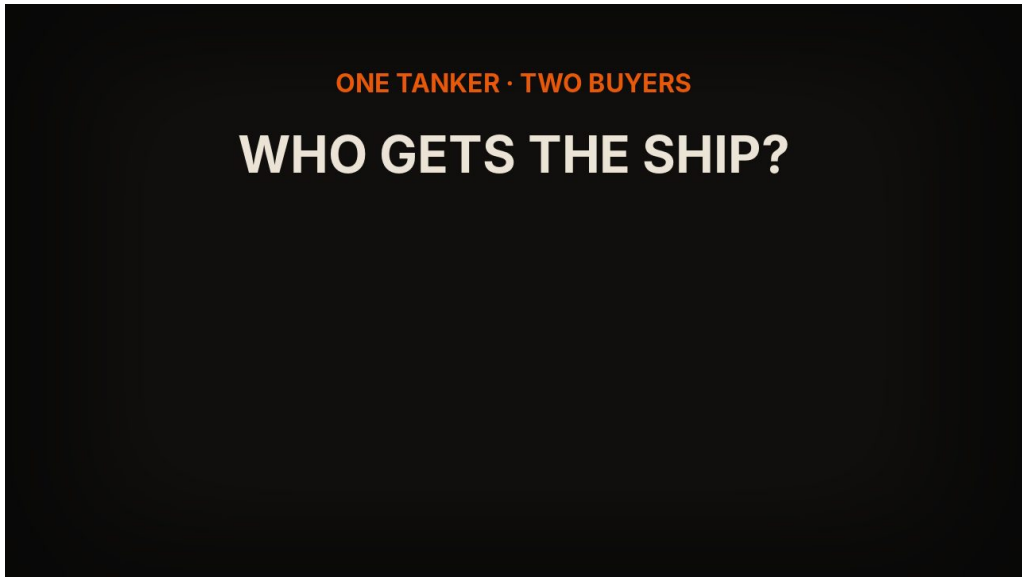

TAG: REPORTED · Euronews · SFX: stamp · FACTS: F20

P2-13 **ON SCREEN: HALF-RECEIPT**

VO: So halfway through, here's the running bill. On the January energy price cap, plus twenty-three to thirty-nine pounds a month. In the EU, a gas-heated home using ten thousand kilowatt hours this winter faces roughly six hundred euros more. With VAT, about seven hundred and fifteen. That's a hundred and twenty to a hundred and forty euros a month. Tell us yours in the comments: we'll read them out.

TAG: ESTIMATE · forecasts; analyst estimate via Euronews · SFX: printer · FACTS: F43 F46

P2-14 **ON SCREEN: WHO GETS THE SHIP?**

VO: But that number assumes Europe can still buy the gas. The real question is: who gets the ship?

SFX: riser

P3-01 **ON SCREEN: PART 3 · THE AUCTION**

VO: Part three. The auction.

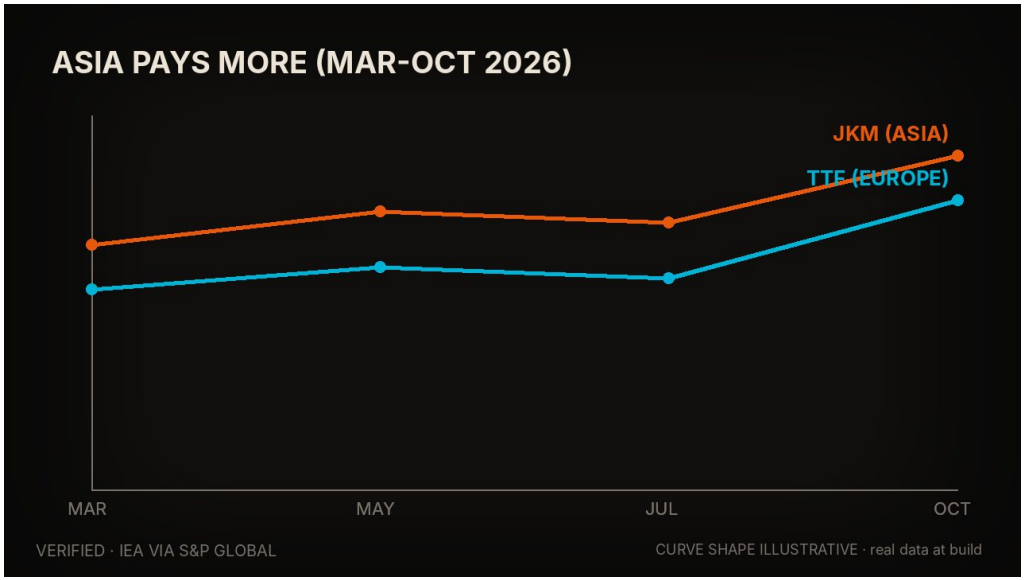

SFX: reverse cymbal + sub drop

P3-02

VO: Liquefied gas doesn't belong to a country until it lands. A tanker in the Atlantic can turn left for Rotterdam or right for Tokyo. It goes where someone pays more.

SFX: whoosh-deep

P3-03 **ON SCREEN: ASIA PAYS MORE (MAR-OCT 2026)**

VO: From March to October 2026, Asia was already paying more than Europe for the same gas.

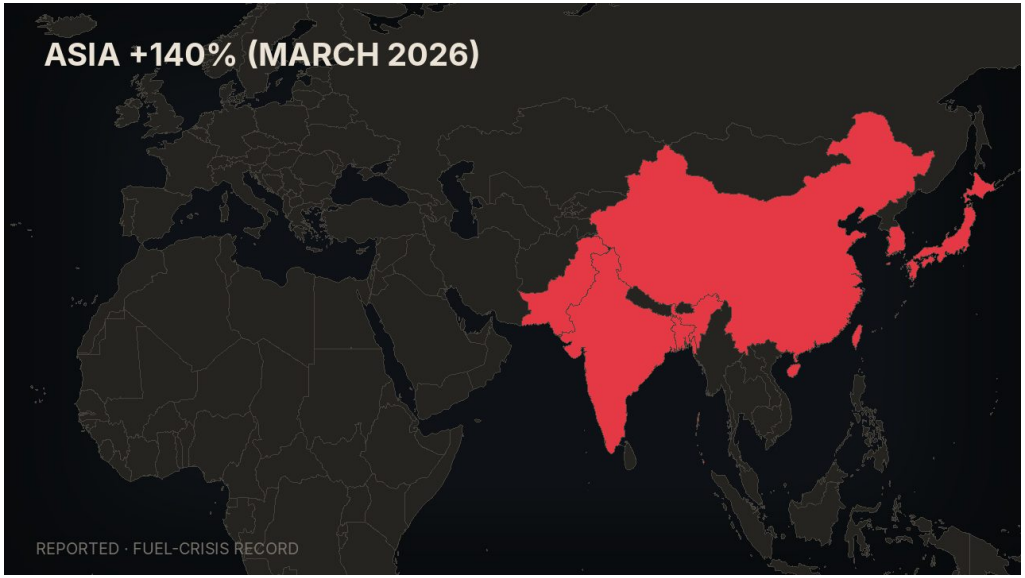

TAG: VERIFIED · IEA via S&P Global · SFX: chart grow · FACTS: F25 F26

P3-04 **ON SCREEN: ASIA DEC LNG: $33.91**

VO: By the second of November, Asian buyers were offering close to thirty-four dollars for December cargoes, far above Europe's average. That's the price Europe has to beat to keep a ship.

TAG: VERIFIED · Platts, 2 Nov 2026 · SFX: counter · FACTS: F25

P3-05 **ON SCREEN: ASIA +140% (MARCH 2026)**

VO: And Asia lost the most. Eighty-three percent of that Gulf gas used to go there. When it stopped, Asian prices jumped more than a hundred and forty percent in March.

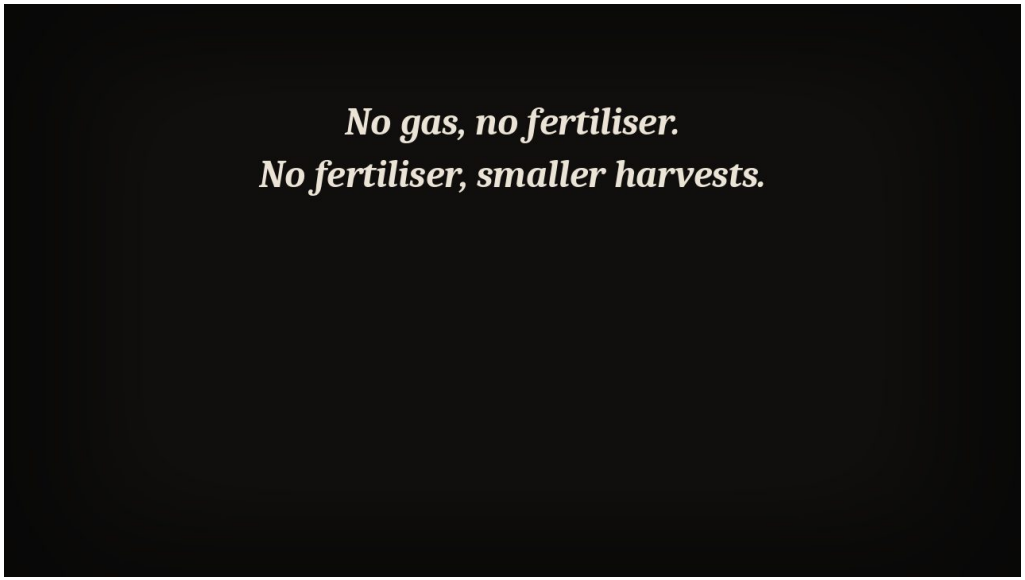

TAG: REPORTED · fuel-crisis record · SFX: sub_808 · FACTS: F03 F27

P3-06 **ON SCREEN: 4 OF 5 UREA PLANTS SHUT**

VO: In Bangladesh, four of its five fertilizer plants have been shut since March, because they run on gas that never came. That's a different bill, and we'll follow it next time.

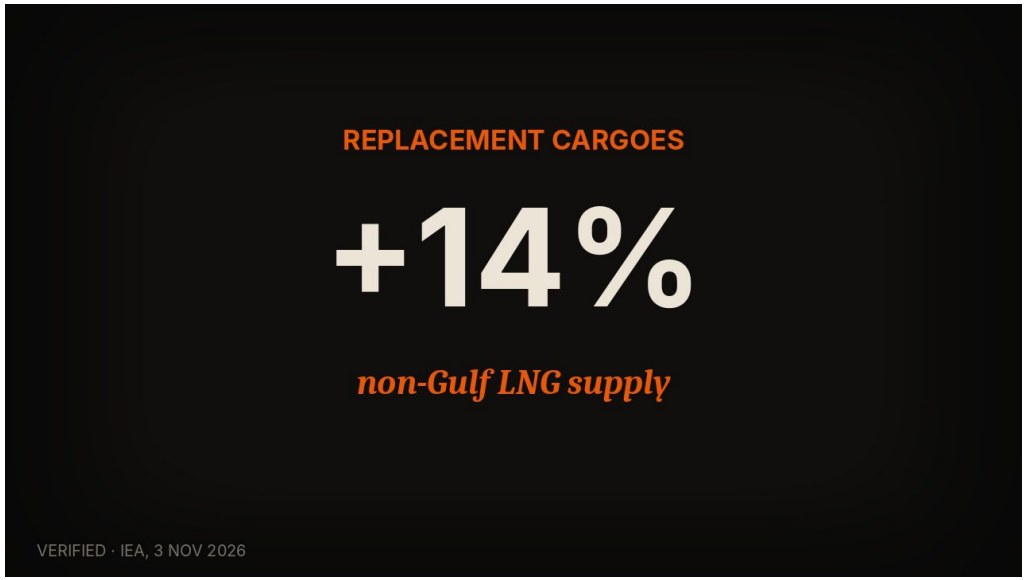

TAG: REPORTED · S&P via EnterpriseAM, Oct 2026 · SFX: drone dip · FACTS: F29

P3-07

VO: Here's the twist. The world isn't short of everyone's gas. It's short of Gulf gas.

SFX: type keys

P3-08 **ON SCREEN: NON-GULF LNG +14%**

VO: The IEA says gas from outside the Gulf rose fourteen percent from March to October. Much of that came from one country. The United States.

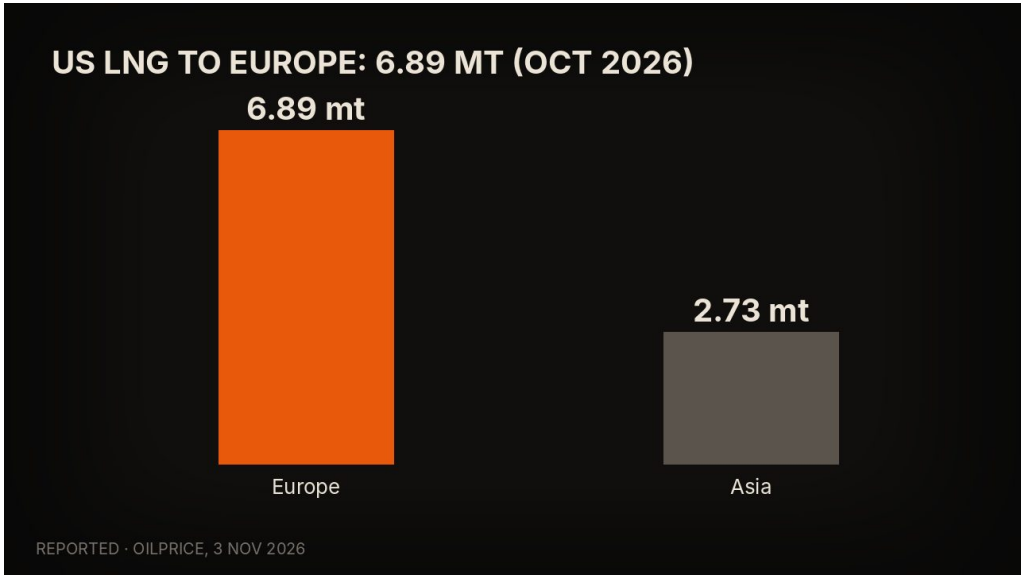

TAG: VERIFIED · IEA, 3 Nov 2026 · SFX: chart grow · FACTS: F12

P3-09 **ON SCREEN: QATAR BUYS US LNG**

VO: Even QatarEnergy, the world's biggest seller before this war, has been buying American gas to cover its own contracts.

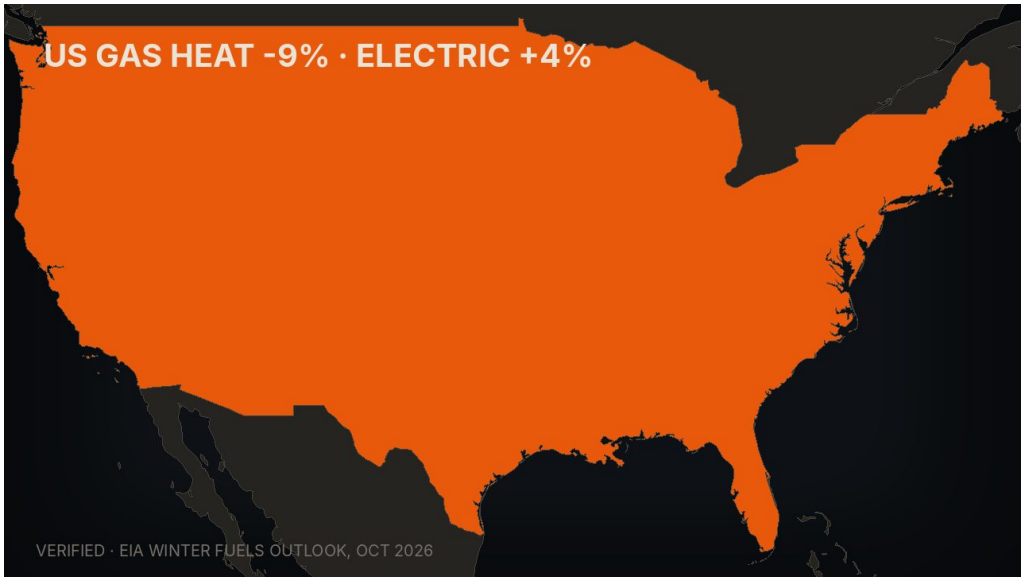

TAG: REPORTED · Reuters via BOE Report, 29 Oct 2026 · SFX: stamp · FACTS: F28

P3-10a **ON SCREEN: US LNG TO EUROPE: 6.89 MT (OCT 2026)**

VO: In October 2026, America shipped almost seven million tonnes of liquefied gas to Europe, and less than three million to Asia. It was the second-biggest month in its history. Europe is now its biggest customer.

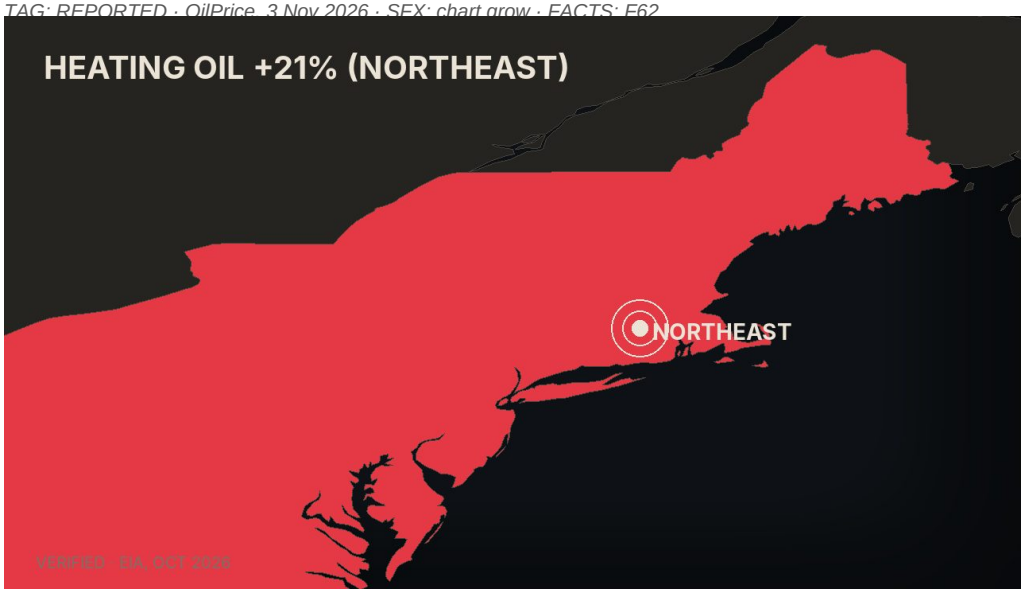

TAG: REPORTED · OilPrice, 3 Nov 2026 · SFX: chart grow · FACTS: F62

P3-10 **ON SCREEN: US GAS HEAT -9% · ELECTRIC +4%**

VO: So in America, the bill looks different. The US Energy Information Administration expects homes heated by gas to spend nine percent less this winter. Homes on electricity, four percent more.

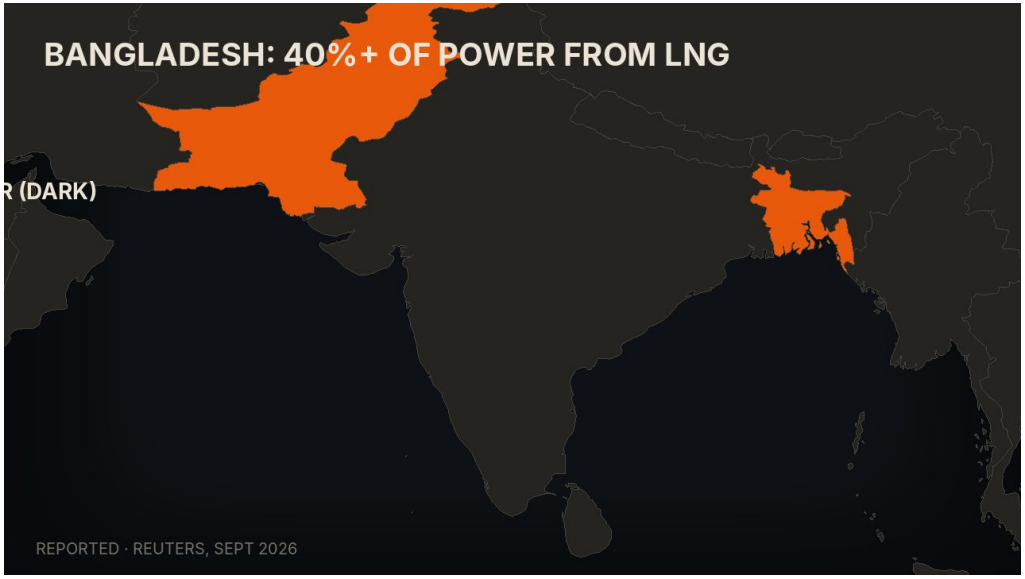

TAG: VERIFIED · EIA Winter Fuels Outlook, Oct 2026 · SFX: tick · FACTS: F31

P3-11 **ON SCREEN: HEATING OIL +21% (NORTHEAST)**

VO: But not everyone in America wins. Heating oil, used by about three percent of homes, mostly in the Northeast, is forecast thirty-four percent dearer. Their bills, up twenty-one percent.

TAG: VERIFIED · EIA, Oct 2026 · SFX: sub hit · FACTS: F31 F32 F33

P3-11a **ON SCREEN: BANGLADESH: 40%+ OF POWER FROM LNG**

VO: And then there are the countries that lose the auction. Bangladesh gets more than forty percent of its electricity from imported liquefied gas, and Qatar used to supply about ninety-five percent of it.

TAG: REPORTED · Reuters, Sept 2026 · SFX: whoosh-deep · FACTS: F64

P3-11b **ON SCREEN: $10 → $30 (SEPT 2026)**

VO: Spot cargoes in Asia went from about ten dollars before the war to about thirty in September. Bangladesh can't outbid Japan for a ship. So in Dhaka, one resident told Reuters she sometimes waits until midnight for enough gas to cook dinner.

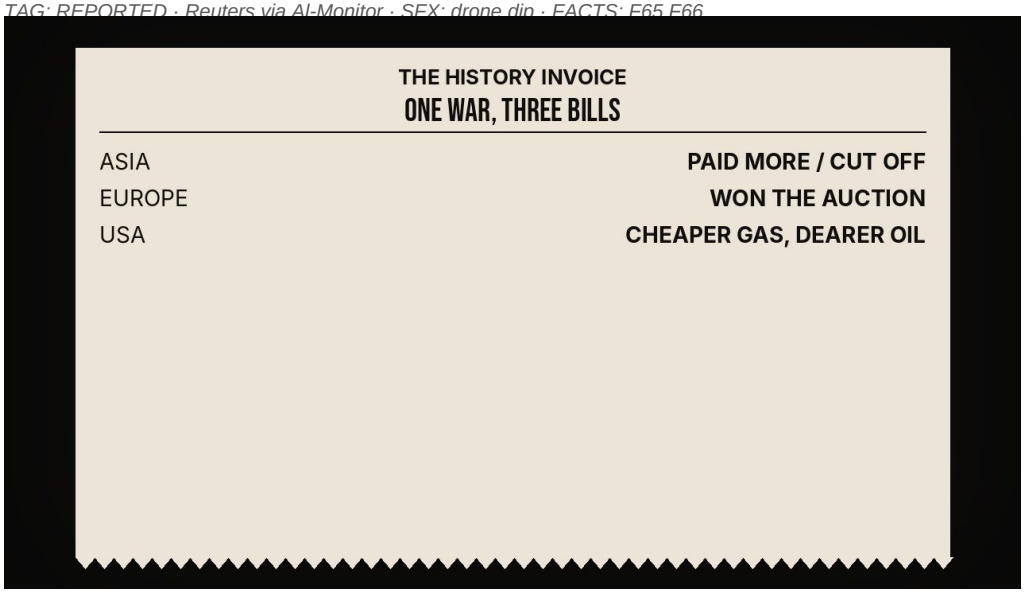

TAG: REPORTED · Reuters via Al-Monitor · SFX: drone dip · FACTS: F65 F66

P3-11c **ON SCREEN: GAS 6-9 · 12-3 · 6-9**

VO: In Pakistan, homes on the gas network get it in three windows a day: six to nine in the morning, twelve to three, and six to nine at night. The country needs nine cargoes for December. That's what losing the auction looks like.

TAG: REPORTED · The News (Pakistan), Sept 2026 · SFX: clock tick · FACTS: F67 F68

P3-12 **ON SCREEN: ONE WAR, THREE BILLS**

VO: So one war sends three different bills. South Asia goes without. Europe pays to outbid Asia. And America sells the gas. Britain's energy price cap is set inside that auction. Which raises the question: haven't we been here before?

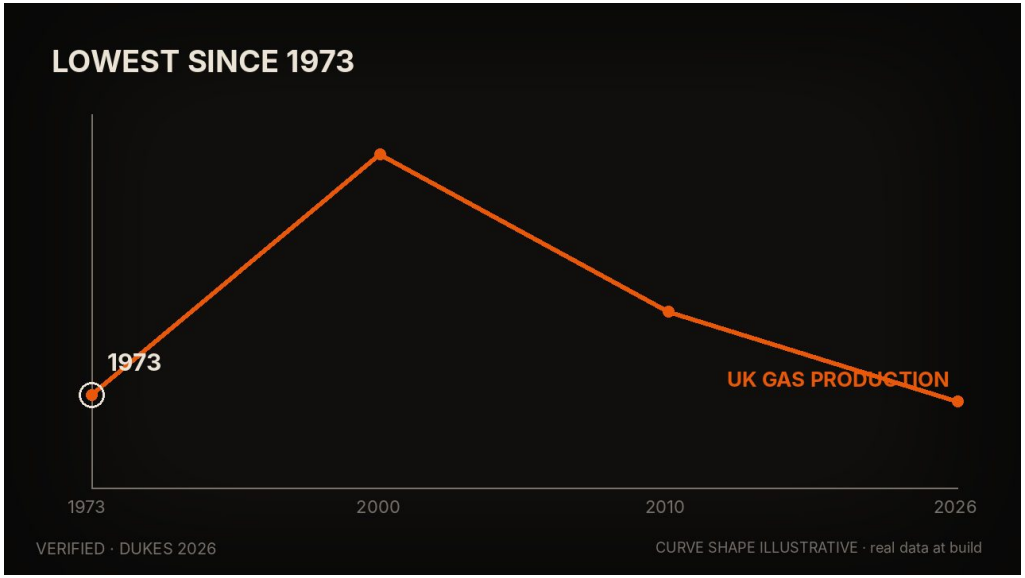

SFX: riser

P4-01 **ON SCREEN: PART 4 · THE LAST TIME**

VO: Part four. The last time.

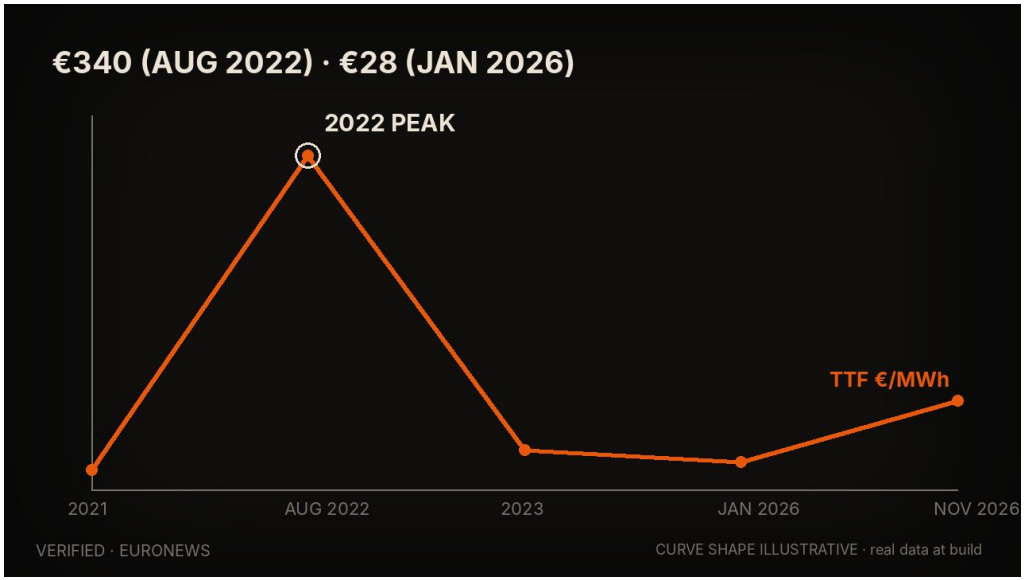

SFX: reverse cymbal + sub drop

P4-01b **ON SCREEN: LOWEST SINCE 1973**

VO: The last time Britain's own gas fields produced this little was 1973. Back then, the North Sea was the answer to an energy crisis. Now it's running down, just as another crisis arrives.

TAG: VERIFIED · DUKES 2026 · SFX: typewriter · FACTS: F58

P4-02 **ON SCREEN: €340 (AUG 2022) · €28 (JAN 2026)**

VO: August 2022. Russia had cut its pipelines to Europe, and the price of gas passed three hundred and forty euros. In January 2026 it was about twenty-eight.

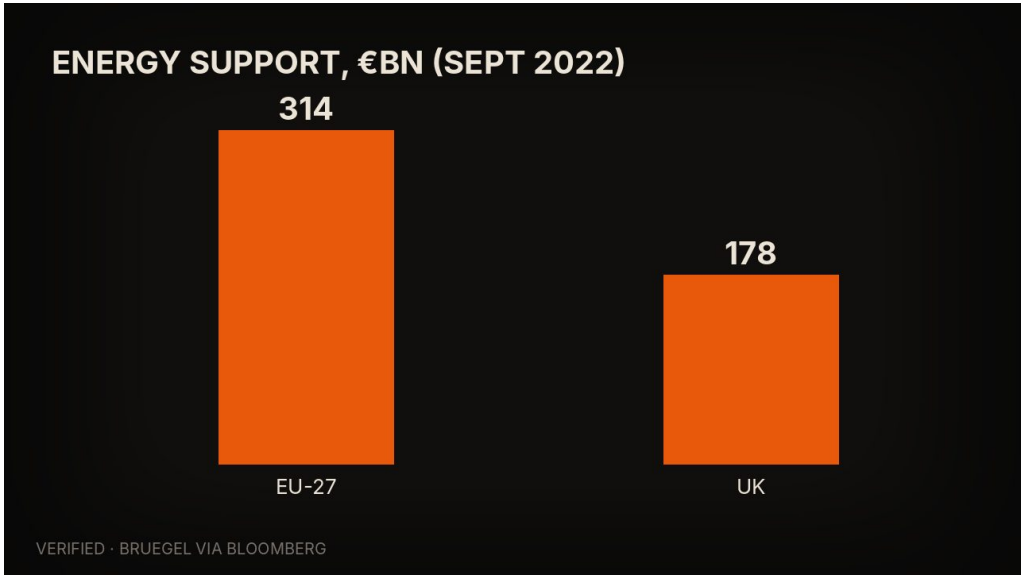

TAG: VERIFIED · Euronews · SFX: chart grow + sub hit · FACTS: F38 F34

P4-03 **ON SCREEN: £3,549 → £2,500 (OCT 2022)**

VO: In October 2022, Britain's price cap was set at three thousand, five hundred and forty-nine pounds. The government stepped in and held a typical bill at two thousand five hundred. About a thousand pounds less per home.

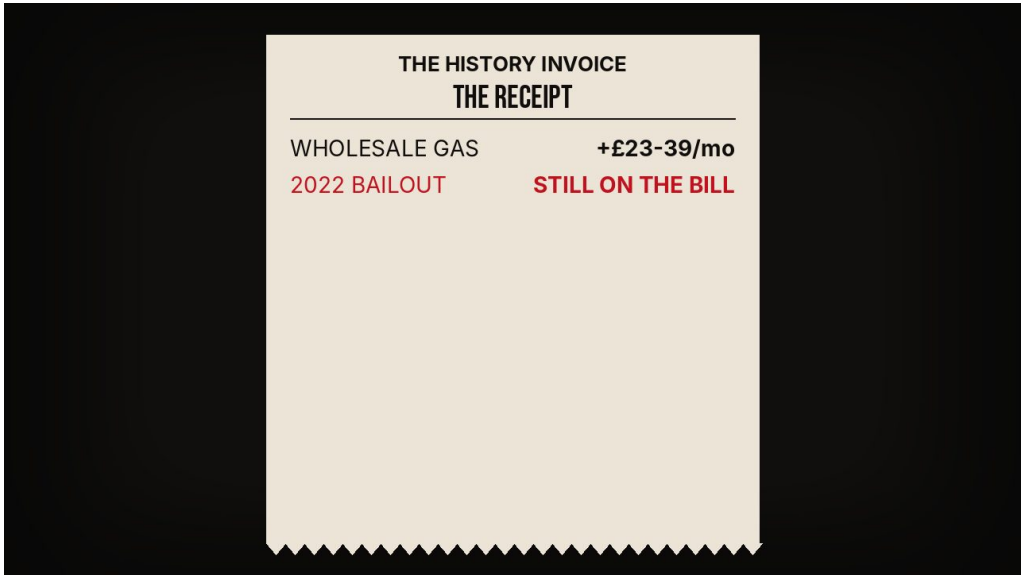

TAG: VERIFIED · Which?, Oct 2022 · SFX: stamp · FACTS: F52

P4-04 **ON SCREEN: ≈€500 BILLION (SEPT 2022)**

VO: By September that year, governments across Europe had committed nearly five hundred billion euros to shield homes and businesses. Britain alone, a hundred and seventy-eight billion.

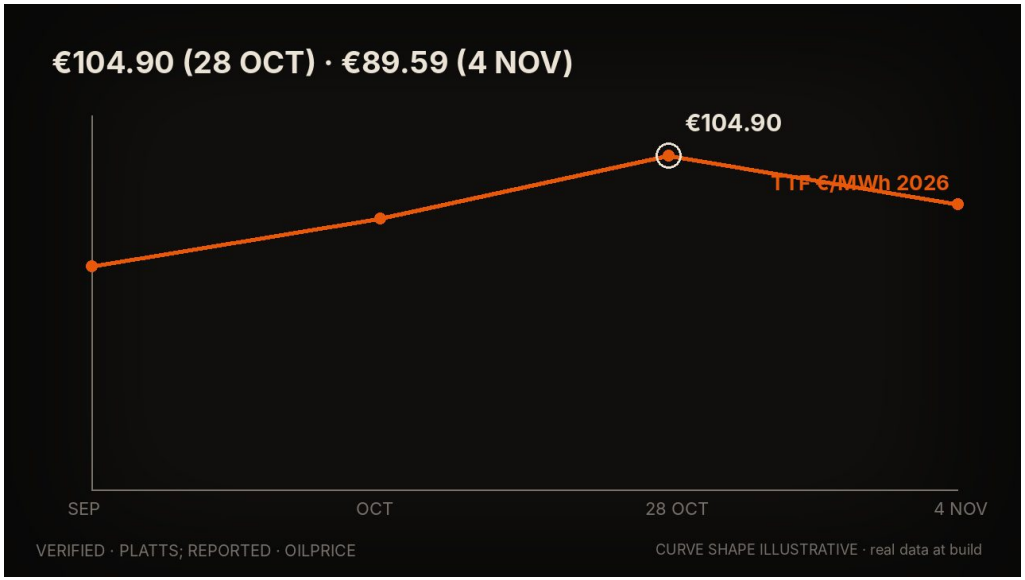

TAG: VERIFIED · Bruegel via Bloomberg · SFX: counter roll · FACTS: F53

P4-05 **ON SCREEN: STILL ON THE BILL**

VO: That money didn't vanish. It became public debt. Which means you're still paying the last winter, through taxes, while the next one arrives.

SFX: printer · FACTS: F53

P4-06 **ON SCREEN: €104.90 (28 OCT) · €89.59 (4 NOV)**

VO: This time, prices are lower than 2022. On the twenty-eighth of October, the benchmark hit about a hundred and five euros, the highest since December 2022. On the fourth of November, about ninety.

TAG: VERIFIED · Platts; REPORTED · OilPrice · SFX: counter · FACTS: F35 F36

P4-07 **ON SCREEN: 0% VAT · ELECTRICITY**

VO: So far, Britain's only new help is zero VAT on household electricity, extended to July 2027. Nothing like 2022 has been announced. Which leaves the last question. Who feels this first?

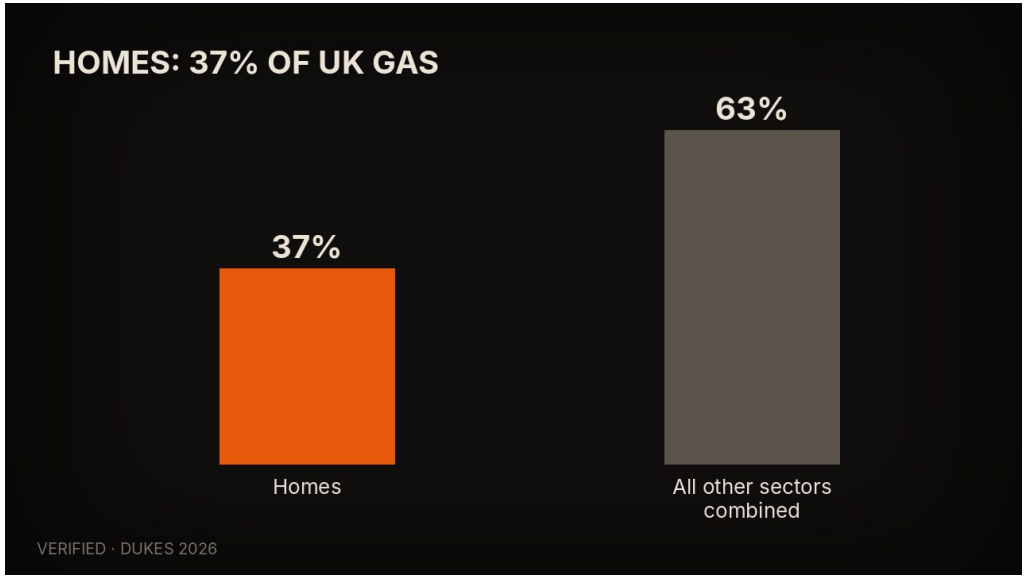

TAG: REPORTED · Budget, 28 Oct 2026 · SFX: riser · FACTS: F45

P5-01 **ON SCREEN: PART 5 · YOUR TABLE**

VO: Part five. Your table.

SFX: reverse cymbal + sub drop

P5-01b **ON SCREEN: HOMES: 37% OF UK GAS**

VO: Homes are the biggest single user of gas in Britain, about thirty-seven percent of the total. So when the price moves, it doesn't land on factories first. It lands on kitchens.

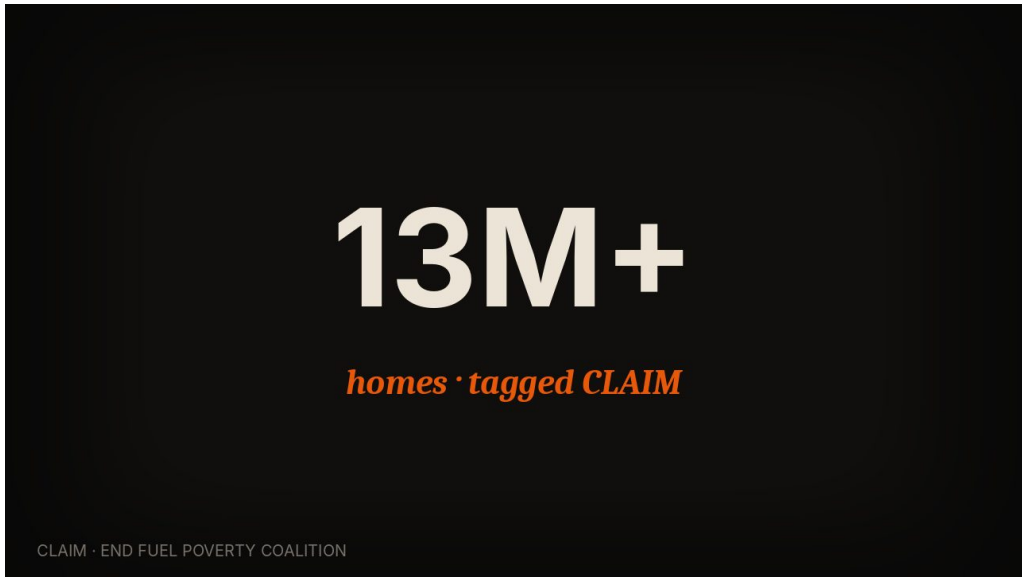

TAG: VERIFIED · DUKES 2026 · SFX: card land · FACTS: F59

P5-02 **ON SCREEN: 2.36M FUEL POOR · 7.6M SPEND >10%**

VO: In England, two point three six million households were officially in fuel poverty in 2025. Seven point six million spent more than ten percent of their income on energy. That was before January's energy price cap.

TAG: VERIFIED · DESNZ via End Fuel Poverty Coalition · SFX: drone · FACTS: F48

P5-03 **ON SCREEN: 13 MILLION+ HOMES**

VO: Campaigners at the End Fuel Poverty Coalition estimate that more than thirteen million UK households will struggle with bills in this crisis. That's their estimate, not an official count.

TAG: CLAIM · End Fuel Poverty Coalition · SFX: card land · FACTS: F49

P5-04 **ON SCREEN: 4,950 (WINTER 2022/23)**

VO: And money isn't the heaviest line on this bill. In the winter of 2022 to 2023, an estimated four thousand nine hundred and fifty excess winter deaths in the UK were caused by cold homes.

TAG: ESTIMATE · ONS data + IHE method, via EFPC · SFX: silence, then single low hit · FACTS: F50

P5-05 **ON SCREEN: WHO PAYS FIRST**

VO: That's an estimate, built from official death figures. But it tells you who pays first. Older people. People on prepayment meters. Anyone who turns the heating off to afford the food.

SFX: type keys · FACTS: F50

P5-06 **ON SCREEN: +12% FEB → SEPT 2026**

VO: In the EU, home gas already cost twelve percent more in September than in February, before the heating season even started.

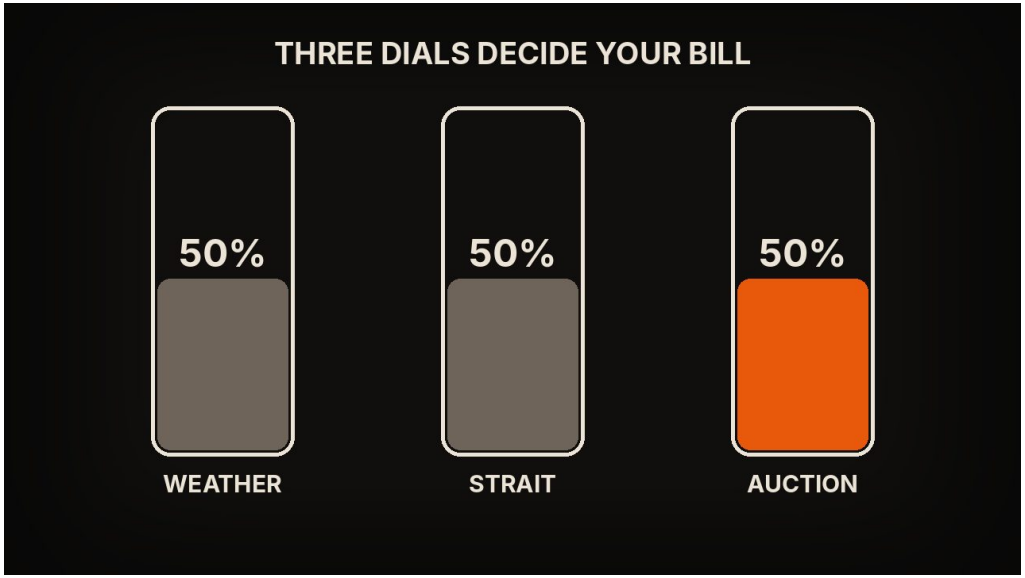

TAG: REPORTED · HEPI via Euronews · SFX: chart grow · FACTS: F47

P5-06b **ON SCREEN: 2022: ~£1,000 OFF · 2026: 0% VAT (ELECTRICITY)**

VO: And the help that exists is smaller than last time. In 2022, the government held a typical bill about a thousand pounds below the cap. So far, for this winter, the new support is zero VAT on electricity. Nothing has been announced for gas.

TAG: VERIFIED · Which?; REPORTED · Budget 28 Oct 2026 · SFX: stamp · FACTS: F52 F45

P5-07

VO: So here's the honest picture. What you pay in January depends on three things nobody controls: the weather, the strait, and how many ships Asia outbids you for.

SFX: tick x3

RC-01 **ON SCREEN: THE RECEIPT**

VO: Here is the receipt.

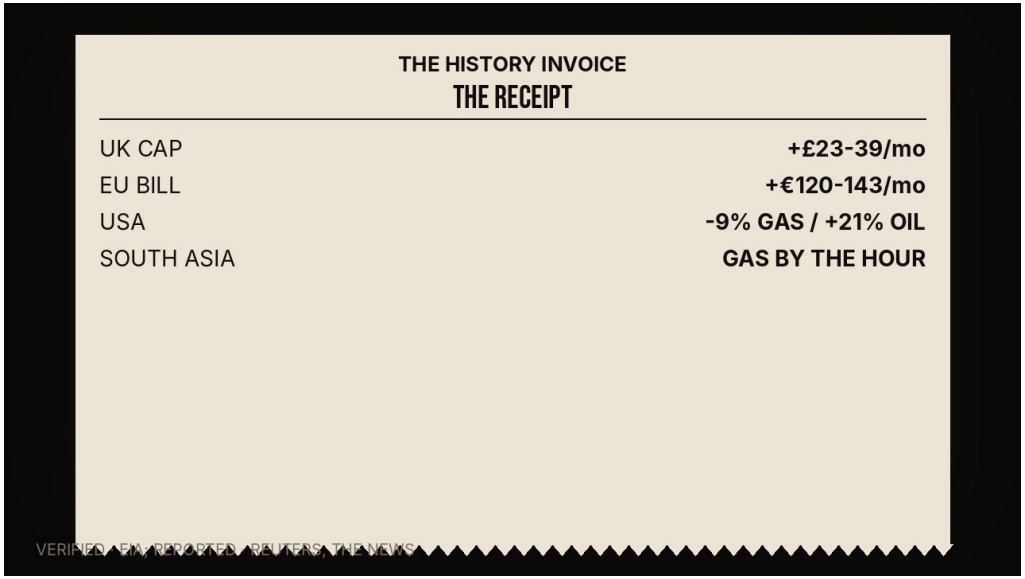

SFX: printer

RC-02 **ON SCREEN: UK +£23-39/MO · EU +€120-143/MO**

VO: Wholesale gas: plus twenty-three to thirty-nine pounds a month on the January energy price cap for a typical British home, if the forecasts hold. Plus a hundred and twenty to a hundred and forty euros a month for a gas-heated home in the EU this winter.

TAG: ESTIMATE · forecasts, Oct 2026 · SFX: printer · FACTS: F43 F46

RC-02b **ON SCREEN: USA -9% GAS / +21% OIL · SOUTH ASIA: HOURS**

VO: In America, the receipt is shorter. Gas-heated homes, about nine percent less this winter. Heating oil in the Northeast, about twenty-one percent more. In Pakistan and Bangladesh, the line isn't money. It's hours: gas three times a day, power cuts, dinner at midnight, in countries where the minimum wage can be about a hundred and forty-five dollars a month.

TAG: VERIFIED · EIA; REPORTED · Reuters, The News · SFX: printer · FACTS: F31 F67 F66 F69

RC-03 **ON SCREEN: STORAGE · 2022 BAILOUT · COLD HOMES**

VO: The storage gamble: paid in time and risk, settled by the weather. The 2022 bailout: still being paid, through taxes. And the line with no price at all: the cold homes.

SFX: printer, final line silent · FACTS: F16 F53 F50

RC-04 **ON SCREEN: 1 READ YOUR METER · 2 BUILD A SMALL CREDIT**

VO: Five things you can do. Read your meter on the thirty-first of December, so January's price isn't charged on December's gas. If you can afford to, keep a small credit on your account going into the winter months.

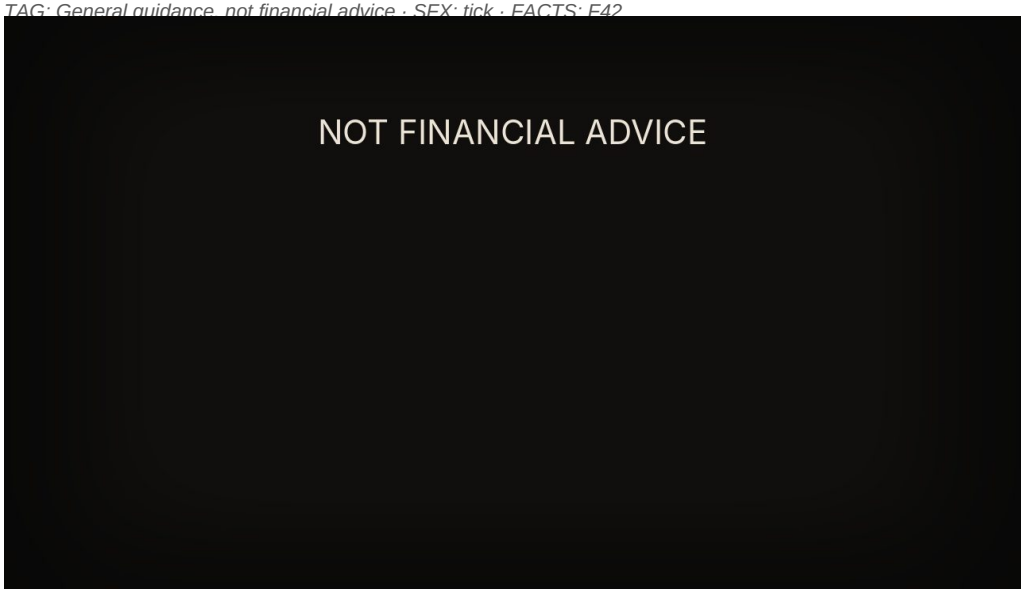

TAG: General guidance, not financial advice · SFX: tick · FACTS: F42

RC-05 **ON SCREEN: 3 CHECK HELP · 4 COMPARE AFTER 25 NOV · 5 TALK EARLY**

VO: Check what help you're entitled to before you need it. Look at fixed deals, but compare them with the new cap after the twenty-fifth of November, not before. And if you're struggling, tell your supplier early. Debt grows faster when nobody talks. And if you're outside Britain, find the date your own regulator or supplier resets prices, and read your meter the day before it does.

TAG: Not financial advice · SFX: tick · FACTS: F42

RC-06 **ON SCREEN: NOT FINANCIAL ADVICE**

VO: This is not financial advice. It's the bill, read out loud.

RC-07 **ON SCREEN: WHAT DID YOUR BILL GO UP BY?**

VO: Tell us in the comments: what did your last energy bill go up by? Your country, and the number.

RC-08 **ON SCREEN: EVERY CRISIS SENDS A BILL. HISTORY KEEPS THE RECEIPTS.**

VO: Ras Laffan is still quiet. Somewhere in the Atlantic, a ship is deciding which way to turn. And on the twenty-fifth of November, a regulator in London will tell you which way it went.

SFX: silence, then soft bed out · FACTS: F07 F42
